

in the administration of the law is the greater of 60 million gallons or 7 percent of U.S. consumption, as determined by the Commission.

For the 12-month period ending September 30, 2008, the Commission has determined the level of U.S. consumption of fuel ethyl alcohol to be 8.88 billion gallons; 7 percent of this amount is 621.5 million gallons (these figures have been rounded). Therefore, the base quantity for 2009 should be 621.5 million gallons.

*Background:* Section 423(c) of the Tax Reform Act of 1986, as amended, which concerns local feedstock requirements for fuel ethyl alcohol imported by the United States from U.S. insular possessions or CBERA-beneficiary countries, requires that the Commission determine annually the amount that is equal to 7 percent of the U.S. domestic market for fuel ethyl alcohol. The Commission published its notice instituting this investigation in the **Federal Register** of March 21, 1990 (55 FR 10512), and published its most recent previous determination for the

2008 amount in the **Federal Register** of December 28, 2007 (72 FR 73883). The Commission uses official statistics of the U.S. Department of Energy to make these determinations, as well as the PIERS database of the *Journal of Commerce*, which is based on U.S. export declarations.

By order of the Commission.

Issued: December 9, 2008.
