SUPPLEMENTARY INFORMATION:

I. Background

Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107-296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS) and its components and offices have relied on preexisting Privacy Act systems of records notices for the maintenance of records that concern invoices processed by the United States Coast Guard (USCG) Non-Federal Invoice Processing System (NIPS).

As part of its efforts to streamline and consolidate its record systems, DHS is updating and reissuing a USCG system of records under the Privacy Act (5 U.S.C. 552a) that deals with invoices processed by NIPS. This record system will allow DHS/USCG to collect and preserve the records regarding invoices processed by NIPS. NIPS is an electronic database that provides for simple tracking and accounting of dental claims. The collection and maintenance of this information will assist DHS/USCG in meeting its obligation to record invoices processed by NIPS.

In accordance with the Privacy Act of 1974 and as part of the Department of Homeland Security's ongoing effort to review and update legacy system of records notices, the Department of Homeland Security is giving notice that it proposes to update and reissue the following legacy record system DOT/CG 576 Non-Federal Invoice Processing System (NIPS) (65 FR 19476, April 11, 2000) as a Department of Homeland Security/United States Coast Guard system of records notice titled, Non-Federal Invoice Processing System. Categories of individuals and categories of records have been reviewed, and the routine uses of this legacy system of records notice have been updated to better reflect the Department of Homeland Security and the United States Coast Guard's—019 Non-Federal Invoice Processing System record system. This new system will be included in the Department of Homeland Security's inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses to which their records are put, and to assist individuals to more easily find such files within the agency. Below is the

description of the NIPS System of Records.

SUPPLEMENTARY INFORMATION:

I. Background

Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107-296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS)/Federal Emergency Management Agency (FEMA) have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records pertaining to the marketing of the National Flood Insurance Program, which is administered by DHS/FEMA.

In 1968, Congress created the National Flood Insurance Program (NFIP) in response to the rising cost of taxpayer funded disaster relief for flood victims and the increasing amount of damage caused by floods.

Nearly 20,000 communities across the United States and its territories participate in the NFIP by adopting and enforcing floodplain management ordinances to reduce future flood damage. In exchange, the NFIP makes federally-backed flood insurance available to homeowners, renters, and business owners in these communities.

Typically, a home or business owner will seek flood insurance from an insurance company that provides other lines of business such as traditional car insurance or property and casualty homeowners insurance. In other cases, a mortgage lender will require flood insurance in addition to regular homeowner's insurance. If a home owner's insurance company participates in the NFIP's Write-Your-Own (WYO) program, and the home or business owner's building is located in a participating NFIP community, the home or business owner can purchase flood insurance.

The NFIP Marketing Files SORN allows DHS/FEMA to market the NFIP program to home and business owners
