Beltway, passengers can transfer from personal vehicles to buses at predetermined locations along the I–95 corridor and along the I–66 corridor outside the capital beltway and congestion inside the beltway will be minimized. Should a weather event, incident, or the need to evacuate arise, management of the situation will be easier with only buses on these facilities.

The temporary closure should have no impact on Interstate commerce. I–95, which is the main north-south Interstate route in the region, is signed around the Washington Beltway (I–495) so that Interstate traffic need not enter the District at all. Commercial vehicles can also use Route 301 to circumvent Washington when traveling between Virginia and Maryland.

Commercial motor vehicles, of the dimensions and configurations described in 23 CFR 658.13 and 658.15, serving the area can utilize the routes listed above in response to 23 CFR 658.11(d)(2)(ii). Vehicles serving the District of Columbia will be unable to do so because the local and National Highway System (NHS) street network will also be closed during the inauguration. Therefore, the closure of the I-395 and I-66 segments of the Interstate will have no material effect on such traffic. Entities requiring deliveries within and adjacent to the area of closed local and NHS streets will be encouraged to receive deliveries before or after January 20th.

To assist in facilitating interstate commerce the VDOT has already begun an extensive coordination effort with the District of Columbia, the State of Maryland and local jurisdictions such as the counties of Fairfax and Arlington to minimize traffic disruptions. Requests have been made for adjacent jurisdictions to cooperate in routing traffic around the closure and warn interstate traffic of the closure by signs, and other means to get the message out to the trucking industry and the rest of the traveling public.
