SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, the Department of Homeland Security (DHS) proposes to partially consolidate DHS-OS-001 Office of Security File System, (71 FR 53700 September 12, 2006), into a new Department wide record system titled, Law Enforcement Authority in Support of the Protection of Property Owned or Occupied by the Federal Government System of Records. Categories of individuals, categories of records, and the routine uses of this legacy system have been reviewed and updated to better reflect the Department's law enforcement records associated with the protection of property owned or occupied by the DHS. Additionally, DHS is issuing a Notice of Proposed Rulemaking (NPRM) concurrent with this system of records elsewhere in the **Federal Register**. DHS has previously issued an NPRM with DHS-OS-001 Office of Security File System, (71 FR 53700 September 12, 2006), but given the changes to this SORN is reissuing the NPRM to again allow for additional public comment.

The activities performed by the Department in the protection of property owned or occupied by the DHS often overlaps with other security-related activities. Accordingly, data within the categories of individuals, categories of records, and routine uses may have similarities with other security-related systems of records, but each system is distinct based on its purpose.

The purpose of this system is to maintain and record the results of law enforcement activities in support of the protection of property owned or occupied by DHS. The results are also used to pursue criminal prosecutions or civil penalties action against individuals or entities suspected of offenses that may have been committed against property owned or occupied by the DHS or persons on DHS property; and to assess acceptability of Departmental, other United States Government personnel contract security officer personnel, and other contractors who work in DHS facilities for assignment to or retention in sensitive positions consistent with the interest of national security and protection of DHS facilities.

In accordance with the Privacy Act of 1974, the Department of Homeland Security proposes to partially consolidate DHS-OS-001 Office of Security File System, (September 12, 2006), into a new Department-wide record system titled, DHS/ALL-025 Law Enforcement Authority in Support

of the Protection of Property Owned or Occupied by Department of Homeland Security System of Records. Categories of individuals, categories of records, and the routine uses of this legacy system have been reviewed and updated to better reflect the Department's law enforcement records associated with the protection of property owned or occupied by DHS. Additionally, DHS is issuing a Notice of Proposed Rulemaking concurrent with this system of records elsewhere in the **Federal Register**. The activities performed by the Department in the protection of property owned or occupied by DHS often overlaps with other security-related activities. Accordingly, data within the categories of individuals, categories of records, and routine uses may have similarities with other security-related systems of records, but each system is distinct based on its purpose. Exclusion is made to perimeters and facilities secured by the United States Secret Service pursuant to 18 U.S.C. 3056 and 3056A and are not included under this system of records. This consolidated system will be included in the Department of Homeland Security's inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses and disseminates individual's records. The Privacy Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency from which information is stored and retrieved by the name of the individual or by some identifying number such as property address, mailing address, or symbol assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. DHS extends administrative Privacy Act protections to all individuals where information is maintained on both U.S. citizens, lawful permanent residents, and visitors. Individuals may request their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR 5.21.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency record keeping

practices transparent, to notify individuals regarding the uses of their records, and to assist individuals to more easily find such files within the agency. Below is a description of "DHS/All—025 Law Enforcement Authorities in Support of the Protection of Property Owned or Occupied by the Department of Homeland Security" Systems of Records Notice.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this new system of records to the Office of Management and Budget (OMB) and to Congress.
