DEPARTMENT OF HOMELAND SECURITY

Office of the Secretary

[Docket No. DHS-2008-0120]

Privacy Act of 1974; Department of Homeland Security—023 Personnel Security Management System of Records

AGENCY: Privacy Office; DHS.

ACTION: Notice of Privacy Act system of records.

SUMMARY: In accordance with the Privacy Act of 1974 and as part of the Department of Homeland Security's ongoing effort to review and update

system of records notices, the Department of Homeland Security proposes to consolidate into a new Department of Homeland Security system of records notice titled, Personnel Security Management System of Records: Treasury/CS.270 Background-Record File of Non-Customs Employees, Treasury/CS.284 Personnel Verification System, and DOT/CG 611 Investigative Case System, and partially consolidate DHS/OS-001 Office of Security File System and FEMA/SEC-1 Security Support System. Categories of individuals, categories of records, and the routine uses of these legacy systems have been reviewed and updated to better reflect the Department's personnel security management record system.

Additionally, the Department of Homeland Security is issuing a Notice of Proposed Rulemaking concurrent with this system of records elsewhere in the **Federal Register**. The activities performed by the Department's Personnel Security program often overlap with other security-related activities such as access control and investigatory records. Accordingly, data within each of the categories of individuals, categories of records, and routine uses may have similarities with other security-related systems of records, but each system is distinct based on its purpose. This consolidated system will be included in the Department of Homeland Security's inventory of record systems.

DATES: Written comments must be submitted on or before February 17, 2009. This new system will be effective February 17, 2009.

ADDRESSES: You may submit comments, identified by docket number DHS-2008-0120 by one of the following methods:

- *Federal e-Rulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Fax:* 703-483-2999.

- *Mail:* Hugo Teufel III, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

- *Instructions:* All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change and may be read at <http://www.regulations.gov>, including any personal information provided.

- *Docket:* For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>.

SUPPLEMENTARY INFORMATION:

I. Background

Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107–296, section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS) and its components and offices have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records that pertain to personnel security management.

As part of its efforts to streamline and consolidate its Privacy Act record systems, DHS is establishing a new agency-wide system of records under the Privacy Act (5 U.S.C. 552a) for DHS personnel security management records. The Personnel Security Management system of records is the baseline system for personnel security activities, as led by the DHS Office of the Chief Security Officer, for the Department. This will ensure that all DHS components follow the same privacy rules for collecting and handling personnel security management records.

In accordance with the Privacy Act of 1974 and as part of DHS's ongoing effort to review and update system of records notices, DHS proposes to consolidate into a new DHS system of records notice titled, DHS/All—023 Personnel Security Management System of Records: Treasury/CS.270 Background-Record File of Non-Customs Employees (66 FR 52984 October 18, 2001), and Treasury/CS.284 Personnel Verification System (66 FR 52984 October 18, 2001), and partially consolidate DHS/OS–001 Office of Security File System (71 FR 53700 September 12, 2006) and FEMA/SEC–1 Security Support System (55 FR 37182 September 7, 1990). Categories of individuals, categories of records, and the routine uses of these legacy systems have been reviewed and updated to better reflect the Department's personnel security management record system. Additionally, the Department of Homeland Security is issuing a Notice of Proposed Rulemaking concurrent with this system of records elsewhere in the **Federal Register**. The activities performed by the Department's Personnel Security program often overlap with other security-related activities such as access control and investigatory records. Accordingly, data within each of the categories of individuals, categories of records, and routine uses may have similarities with other security-related systems of

records, but each system is distinct based on its purpose.

The purpose of this system is to maintain processing records of personnel security-related clearance actions; to record suitability determinations; security clearances issued or denied; and to verify eligibility for access to classified information or assignment to a sensitive position. Also, records may be used by the Department for adverse personnel actions such as removal from sensitive duties, removal from employment, and denial to a restricted or sensitive area, and revocation of security clearance. The system also assists in capturing background investigations and adjudications; directing the clearance process for granting, suspending, revoking and denying access to classified information; managing state, local and private sector clearance programs and contractor suitability programs; determining eligibility for unescorted access to DHS facilities or information technology systems; and other activities relating to personnel security management responsibilities at DHS.

The Office of the Chief Security Officer is currently implementing a new web-based personnel and information security application, Integrated Security Management System (ISMS). ISMS will replace the existing case management system currently in use for Customs and Border Protection, Federal Law Enforcement Training Center, Immigration and Customs Enforcement, and Federal Emergency Management Agency.

Further, this system of records is separate from DHS–OS–2006–047 Personal Identity Verification Management System (71 FR 53697 September 12, 2006), which supports the administration of the HSPD–12 program that directs the use of a common identification credential for both logical and physical access to federally controlled facilities and information systems while enhancing security, increasing efficiency, reducing identity fraud, and protecting personal privacy. This consolidated system will be included in DHS's inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses and disseminates individual's records. The Privacy Act applies to information that is maintained in a "system of records." A "system of records" is a group of any

records under the control of an agency from which information is stored and retrieved by the name of the individual or by some identifying number such as property address, mailing address, or symbol assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. DHS extends administrative Privacy Act protections to all individuals where information is maintained on both U.S. citizens, lawful permanent residents, and visitors. Individuals may request their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses of their records, and to assist individuals to more easily find such files within the agency. Below is a description of the Personnel Security Management System of Records.
