

year-round easement could result in an inconsistency with Forest Plan standards for MA 5.41. In order to approve road reconstruction and year-round access to the inholding across NFS lands, an amendment to the Forest Plan would be necessary. This amendment would be specific to standards included in MA 5.41 related to biodiversity and infrastructure.

Permits or Licenses Required

- An Eagle County grading permit(s) would be required for road construction on NFS and private lands.
- Building construction permits would be required for individual buildings on each lot.

Scoping Process

Publication of a Notice of Intent (NOI) in the **Federal Register** begins the planning process under provisions of the National Environmental Policy Act. Comments will be accepted during the 45-day scoping period as described in this NOI. Comments will be reviewed and issues identified. Issues that cannot be resolved by mitigation or minor changes to the proposed action may generate alternatives to the proposed action. This process is driven by comments received from the public, other agencies, and internal Forest Service concerns. To assist in commenting, a scoping letter providing more detailed information on the project proposal (including a map) has been prepared and is available to interested parties. Contact Brian Lloyd, District Ranger, at the address listed in this NOI if you would like to receive a copy.

Comment Requested

This notice of intent initiates the scoping process that guides the development of the environmental impact statement. Comments that are site-specific in nature are most helpful to resource professionals when trying to narrow and address the public's issues and concerns.

Early Notice of Importance of Public Participation in Subsequent Environmental Review

A Draft Environmental Impact Statement will be prepared for comment. The comment period on the Draft Environmental Impact Statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First,

reviewers of Draft Environmental Impact Statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the Draft Environmental Impact Statement stage but that are not raised until after completion of the Final Environmental Impact Statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45 day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the Final Environmental Impact Statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the Draft Environmental Impact Statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the Draft Environmental Impact Statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the Environmental Impact Statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions. The submission of timely and specific comments can affect a reviewer's ability to participate in subsequent administrative appeal or judicial review.
