**Revised Record of Decision for the Environmental Impact Statement on a Proposed Nuclear Weapons Nonproliferation Policy Concerning Foreign Research Reactor Spent Nuclear Fuel**

**AGENCY:** National Nuclear Security Administration, Department of Energy.

**ACTION:** Revised Record of Decision.

**SUMMARY:** The Department of Energy (DOE) is further revising the Record of Decision (61 FR 25092; May 17, 1996) on the *Environmental Impact Statement on a Proposed Nuclear Weapons Nonproliferation Policy Concerning Foreign Research Reactor Spent Nuclear Fuel* (FRR SNF EIS) (DOE/EIS-0218, February 1996) to allow the United States to transport up to 1 metric ton heavy metal (MTHM) (1.1 tons) of spent nuclear fuel (Gap Material SNF) from foreign research reactor (FRR) locations to the United States and safely store this Gap Material at a DOE site pending disposition. Gap Material consists primarily<sup>1</sup> of a limited quantity of (1) SNF containing non-U.S.-origin highly enriched uranium (HEU) and (2) SNF containing U.S.-origin HEU that was not previously addressed in the FRR SNF EIS. DOE prepared a Supplement Analysis of the FRR SNF EIS in accordance with DOE's National Environmental Policy Act (NEPA) Implementing Procedures (10 CFR Part 1021). This analysis addressed the potential health and environmental impacts of accepting Gap Material SNF and concluded that the recovery and transport of this material to the United States would constitute neither substantial changes to the proposed action nor significant new circumstances relevant to environmental concerns bearing on the proposed action evaluated in the FRR SNF EIS. Acceptance of Gap Material SNF would not cause the total quantity of SNF projected to be received under DOE's FRR SNF Acceptance Program to exceed the estimates analyzed in the FRR SNF EIS.

**ADDRESSES:** The Supplement Analysis will be available on DOE's NEPA Web

<sup>1</sup> The GAP Material addressed in this Revised Record of Decision also includes certain non-U.S.-origin unirradiated fuel (fresh fuel) containing HEU.
