* The Standards Council of Canada (SCC) voted to end its Laboratory Accreditation Program for Substance Abuse (LAPSA) effective July 12, 1998. Laboratories certified through that program were accredited to conduct forensic urine drug testing as required by U.S. Department of Transportation (DOT) regulations. As of that date, the certification of those accredited Canadian laboratories will continue under DOT authority. The responsibility for conducting quarterly performance testing plus periodic on-site inspections of those LAPSA-accredited laboratories was transferred to the U.S. HHS, with the HHS' NLCP contractor continuing to have an active role in the performance testing and laboratory inspection processes. Other Canadian laboratories wishing to be considered for the NLCP may apply directly to the NLCP contractor just as U.S. laboratories do.

Upon finding a Canadian laboratory to be qualified, HHS will recommend that DOT certify the laboratory (**Federal Register**, July 16, 1996) as meeting the minimum standards of the Mandatory Guidelines published in the **Federal Register** on April 13, 2004 (69 FR 19644). After receiving DOT certification, the laboratory will be included in the monthly list of HHS-certified laboratories and participate in the NLCP certification maintenance program.

I. Abstract

We have contracted with the U.S. Geological Survey (USGS) to conduct a survey of national wildlife refuge visitors so that we can better understand their recreational, educational, and information experiences. The Policy Analysis and Science Assistance Branch of the USGS will conduct the survey onsite at approximately 75 national wildlife refuges nationwide. Respondents will have the option to return the survey by mail or to complete it online.

We will use this survey to measure visitor satisfaction with current visitor services and facilities and their desire for future services and facilities. Information from this survey will provide refuge managers, planners, and visitor services professionals with scientifically sound data that can be used to:

- (1) Prepare conservation planning documents,
- (2) Improve the design of visitor facilities,
- (3) Tailor visitor services and facilities to match visitor interests and needs,
- (4) Better protect refuge resources by combining this data with biological data, and
- (5) Understand the economic impact of visitors to the local community. Additionally, this survey can target public access and transportation planning issues related to wildlife-oriented recreational opportunities such as auto tour routes, trails, parking lots, and roads.
