SUPPLEMENTARY INFORMATION: FERC-546 (Certificated Rate Filings: Gas Pipeline Rates; OMB Control Number 1902-0155) is required to implement Sections 4, 5, 16 and 7(e) of the Natural Gas Act (NGA) (15 U.S.C. 717-717w). NGA Sections 4, 5 and 16 authorize the Commission to inquire into rate structures and methodologies and to set rates at a just and reasonable level. Section 7(e) authorizes the Commission to set initial rates that are in keeping with the public convenience and necessity.

The Commission uses the FERC-546 information to examine service and tariff provisions for the transportation and storage, and/or sale of natural gas in interstate commerce filed with the Commission.

When a pipeline decides to construct and operate a jurisdictional pipeline, it files an application with the Commission and receives a Certificate of Public Convenience and Necessity. As part of its review, the Commission considers and authorizes "initial rates" for transportation and/or storage service for the pipeline. Initial rates are established for new services authorized in certificate proceedings and must meet a public convenience and necessity standard. Initial rates established in the certificate proceeding remain in effect until such rates are reviewed by the Commission in a rate proceeding. The information submitted by the pipeline company to the Commission in these applications for initial rates is the subject of FERC-546.¹

The Commission's reporting requirements for this information collection are provided in 18 CFR 154.4, 154.7, 154.202, 154.204-.209, and 154.602-.603. Failure to collect this information would prevent the Commission from monitoring and properly evaluating pipeline proposals to add or modify services.

Action: The Commission is requesting a three-year extension of the current reporting requirements.

Burden Statement: Public reporting burden for this collection is estimated at:

FERC Data Collection—FERC-546	Number of respondents annually	Number of responses per respondent	Average burden hours per response	Total annual burden hours
	(1)	(2)	(3)	(1) × (2) × (3)
Natural Gas Companies	77	4	40	12,320
Storage Operators	3	1	350	1,050

¹ The Commission collects information necessary to examine and approve any change in rates

separately under FERC-542 and FERC-545. The FERC-542 is for tracking filings, and FERC-545 is

for general rate change filings, including NGA Section 4 major rate cases.
