

adjudicators are not required to develop evidence about each of them. They are simply a frame of reference for determining whether children are functioning typically for their age with respect to attending and completing tasks.

1. Newborns and Young Infants (Birth to Attainment of Age 1)

Examples of Limitations in the Domain of "Attending and Completing Tasks"

To further assist adjudicators in evaluating a child's impairment-related limitations in the domain of "Attending and completing tasks," we also provide the following examples of some of the limitations we consider in this domain. These examples are drawn from our regulations and training. They are not the only examples of limitations in this domain, nor do they necessarily describe a "marked" or an "extreme" limitation.

In addition, the examples below may or may not describe limitations depending on the expected level of functioning for a given child's age. For example, a toddler would not be expected to be able to play a game or stay on another task for an hour, but a teenager would.¹⁴

- Is easily startled, distracted, or overreactive to everyday sounds.
- Is slow to focus on or fails to complete activities that interest the child.
- Gives up easily on tasks that are within the child's capabilities.
- Repeatedly becomes sidetracked from activities or frequently interrupts others.
- Needs extra supervision to stay on task.
- Cannot plan, manage time, or organize self in order to complete assignments or chores.
