

about possible modifications before coming to the meeting.

Agenda: The committee will discuss, make recommendations, and vote on a premarket approval application, sponsored by TherOx, Inc., for the TherOx Aqueous Oxygen System (AO System). The system is intended for use in acute myocardial infarction (AMI) patients, who have undergone successful revascularization less than or equal to 6 hours from symptom onset. These patients were randomized to AO Therapy or not. The endpoint is reduction in the final size of the infarct. The system draws blood from the patient, hyperoxygenates it with the AO cartridge component of the system, and reinfuses the blood via the infusion catheter directly to the infarction site of the heart. This therapy is intended to be performed for 90 minutes post percutaneous coronary intervention/stenting.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its Web site prior to the meeting, the background material will be made publicly available at the location of the advisory committee meeting, and the background material will be posted on FDA's Web site after the meeting. Background material is available at <http://www.fda.gov/ohrms/dockets/ac/acmenu.htm>, click on the year 2009 and scroll down to the appropriate advisory committee link.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person on or before March 4, 2009. Oral presentations from the public will be scheduled approximately 30 minutes at the beginning of committee deliberations and approximately 30 minutes near the end of the deliberations. Those desiring to make formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before February 25, 2009. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons

regarding their request to speak by February 26, 2009.
