■ 2. Add a new temporary § 165.T11-148 to read as follows:

§ 165.T11-148 Safety Zone; Naval Underwater Detonation; Northwest Harbor, San Clemente Island, CA.

(a) *Location.* The limits of the safety zone will include the navigable waters of the Northwest Harbor of San Clemente Island bounded by the following coordinates: 33°02'06" N, 118°35'36" W; 33°02'00" N, 118°34'36" W; thence along the coast of San Clemente Island to 33°02'06" N, 118°35'36" W.

(b) *Enforcement Period.* This section will be enforced from February 1, 2009 through April 1, 2009. If the training is concluded prior to the scheduled termination time, the COTP will cease enforcement of this safety zone and will announce that fact via Broadcast Notice to Mariners.

(c) *Definitions.* The following definitions apply to this section: *designated representative*, means any Commissioned, Warrant, or Petty Officers of the Coast Guard, Coast Guard Auxiliary, or local, state, and federal law enforcement vessels who have been authorized to act on the behalf of the COTP; *non-authorized personnel and vessels*, means any civilian boats, fishermen, divers, and swimmers.

(d) *Regulations.* (1) Entry into, transit through or anchoring within this safety zone is prohibited unless authorized by the COTP San Diego or his designated representative.

(2) Non-authorized personnel and vessels requesting permission to transit through the safety zone may request authorization to do so from the COTP San Diego or his designated representative. They may be contacted on VHF-FM Channel 16, or at telephone number (619) 278-7033.

(3) Naval units involved in the exercise are allowed in confines of the established safety zone.

(4) All persons and vessels shall comply with the instructions of the Coast Guard COTP or his designated representative.

(5) Upon being hailed by U.S. Coast Guard or other official personnel by siren, radio, flashing light, or other means, the operator of a vessel shall proceed as directed.

(6) The Coast Guard may be assisted by other federal, state, or local agencies and the U.S. Navy.

Dated: February 3, 2009.

T.H. Farris,

Captain, U.S. Coast Guard, Captain of the Port San Diego.

POSTAL SERVICE

39 CFR Part 111

New Pricing Eligibility, Intelligent Mail, and Move Update Standards for Domestic Mailing Services and Shipping Services

AGENCY: Postal Service™.

ACTION: Final rule.

SUMMARY: The Postal Service is filing a notice of domestic Mailing Services (and selected Shipping Services) price adjustments, effective in May 2009, with the Postal Regulatory Commission. This final rule provides revised eligibility standards related to the new prices in May 2009.

DATES: Effective May 11, 2009.

FOR FURTHER INFORMATION CONTACT: Bill Chatfield, 202-268-7278.

SUPPLEMENTARY INFORMATION: The Postal Service's final rule includes revised eligibility standards directly related to prices established by the USPS® Governors. We are including a new incentive program for Standard Mail® saturation mailers. The final rule also contains modifications regarding the implementation of the full-service Intelligent Mail® option and a revision to Move Update standards. Additional mail classification changes have been proposed and were published in the **Federal Register** on February 6, 2009 (74 FR 6250-6257).

We summarize revisions by shape of mail, and then provide updates to Intelligent Mail and Move Update, followed by changes to the mailing standards in *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM®).

Automation Flats

Effective May 2009, we require all automation flats to bear barcodes that include delivery point routing codes, as currently required for automation letters. We announced this change as part of the final rule for implementation of our Intelligent Mail program, but reiterate it here.

Saturation Mail Volume Incentive Program for Standard Mail

The Postal Service implements an incentive program for saturation mailers who increase their saturation Standard

Mail letters or flats volume. This increase can result from a growth in total mailed volume or a growth in market coverage within a defined market. Mailers able to demonstrate an increase in Standard Mail saturation mailing volume from the prior year will qualify for a per-piece credit for the incremental volume during the program period.

This program begins May 11, 2009 and ends May 10, 2010. If successful, the program may be extended, on a year-by-year basis. For approved participants, the program provides a per-piece credit, to the participant's specified Centralized Account Payment System (CAPS) account, for the verified, incremental volume exceeding the base volume demonstrated in the previous year (May 11, 2008 to May 10, 2009). Participating mailers must pay postage through a permit imprint advance deposit account at the time of application and must have a functioning CAPS account prior to the close of the program period. Each permit imprint advance deposit account used for the payment of postage for saturation mailings must be established at a postal facility having *PostalOne!*® capability.

Mailers wishing to participate in the Standard Mail saturation mail volume incentive program must submit a letter requesting participation to their District Manager, Business Mail Entry (see the postal locator link of the Postal Explorer® at <http://pe.usps.com> and click on Business Mail Entry for contact information). Those interested in participating must apply between February 11, 2009 and June 11, 2009. Requests must be completed and submitted by an authorized official of the business or nonprofit entity that owns the mail. For the purposes of participation in this program, an entity is defined as the parent organization. Franchisees that are not separate business entities may not apply for the incentive independently of the parent organization. Printers and mailing agents may not request participation on behalf of customers for which they prepare the mail. Participating mailers must be able to demonstrate saturation mailing activity in both the 2007 and 2008 calendar years with a minimum of six saturation mailings in the 2008 calendar year.

Mailers who choose to participate only within a market area, must demonstrate volume growth within a specific USPS sectional center facility (SCF) service area over the program period to qualify for the incentives. For example, a mailer can choose to participate for saturation mail destined within the Miami FL SCF,

but not include mail destinating within the Ft. Lauderdale FL SCF. In this example, the mailer could qualify for a credit with an increase in saturation volume within the Miami FL SCF independently of fluctuations in volumes destinating in other areas.

Mailers requesting eligibility for a market-specific volume increase must submit mailing documentation electronically to the Postal Service using a USPS-approved method (e.g. Mail.dat) at the time of application and for all mailings during their participation in the program. Mailers selecting this option must demonstrate saturation mail volume to ZIP Codes within the specified SCF(s) in both the 2007 and 2008 calendar years and must demonstrate a minimum of six saturation mailings to the specified SCF(s) in the 2008 calendar year.

Changes for Parcels

Standard Mail Parcels and Not-Flat Machinable Pieces (NFM)s

The Postal Service is revising sections 440 and 705.8 of the DMM to change mail preparation requirements and the pricing structure for Standard Mail machinable and irregular parcels, and NFMs prepared in sacks and pallets.

For commercial mailers, there are new sorting standards to reduce the number of sacks in a mailing and to better align parcel-size mail preparation with mail processing.

We are not changing the price categories for machinable parcels; however, for pieces entered at origin, there will no longer be a 5-digit price. To be eligible for BMC prices when presented at origin, machinable parcels must be palletized and weigh a minimum of 200 pounds per pallet.

For irregular parcels and NFMs, the 5-digit and 5-digit scheme price structure remains the same; however this price is only available with destination entry (DBMC, DSCF, or DDU). Since parcel sorters in our processing plants run SCF schemes rather than individual 3-digit schemes, SCF presort prices replace 3-digit presort prices. SCF presort prices are available only when SCF-sorted parcels are entered at a DSCF or DBMC.

We are renaming the ADC price level as the new BMC price level. Similarly, mixed BMC prices replace mixed ADC prices. When parcels sorted to BMCs are entered at origin, the pieces must be palletized and the pallet must contain a minimum of 200 pounds. To support our realignment of the processing of irregular parcels, we add that category to the preambles for DMM Labeling Lists L601 and L602. We remove references to irregular parcels from

Labeling List L009 and eliminate L603 and L604 altogether. Existing Content Identifier Numbers (CINs) for irregular parcels are revised to reflect SCF preparation instead of 3-digit preparation and BMC/ASF and mixed BMC preparation instead of ADC and mixed ADC preparation.

We add a new origin-BMC (intra-BMC turnaround) sortation level for all Standard Mail parcels and NFMs with no minimum number of pieces required. Intra-BMC turnaround pieces are those pieces that destinate in the same BMC that serves the office where the pieces are accepted and verified. For example, referring to labeling list L601, BMC Springfield serves ZIP Codes 010–067, 120–123, 128, and 129. Mailers entering pieces at the Northampton MA Post Office (ZIP Code 01060, which is served by the Springfield BMC) must separately sort pieces to ZIP Code ranges 010–067, 120–123, 128, 129, which are within the service area of the Springfield BMC. These pieces are the origin-BMC pieces, also known as intra-BMC turnaround pieces. Mailers use L601 to make this determination. All other residual pieces are sorted as mixed BMC pieces. In summary, mailers with origin-entered mailings must separate intra-BMC turnaround pieces from mixed BMC pieces.

The option to combine certain categories of Standard Mail parcels and Package Services and Parcel Select® parcels in the same mailing remains, but is modified to require minimum 200 pound pallets when Standard Mail parcels are combined with Parcel Select BMC parcels.

Parcel Post and Parcel Select

The new structure for Parcel Post® merges the Intra-BMC and Inter-BMC prices to create a single price (at each weight level) in each zone. This is the same structure that applies to Priority Mail®, and our competitors' prices, and will make price comparisons easier for retail customers. In the new, merged structure, the price for the Local zone is combined with the Zones 1 and 2 prices. We further simplify Parcel Post by eliminating the separate nonmachinable surcharge.

Parcel Select prices for Origin BMC Presort, BMC Presort, and Barcoded Inter-BMC and Barcoded Intra-BMC did not change in January 2009. These prices are calculated based on Parcel Post. Accordingly, these prices are revised concurrently with the price change effective on May 11, 2009. As a result, prices for the overall Parcel Select product increase by an additional one-half of one percent. The nonpresort categories (Barcoded Inter-BMC and

Intra-BMC) are merged into one category, Barcoded Nonpresort. We have not made any changes to Parcel Select Destination Entry prices.

Changes for Confirm Service

The Confirm® pricing structure is changing. We add a lower-priced Bronze subscription level for mail owners. Two separate price points for the Gold and Platinum subscription levels are added to distinguish between a mail owner and a mailing agent. The Bronze and Silver subscription levels will be available only to mail owners.

A *mail owner* is the business entity (or individual) who makes business decisions regarding the mailpiece content, directly benefits from the mailing, and ultimately pays for postage on the mailpiece. A *mailing agent* is a business entity acting on behalf of one or more mail owners by providing mailing services for which the mail owners compensate the mailing agent. Mailing agents include, but are not limited to: Printer; letter shop; address list provider/manager; mail preparer; postage payment provider; mailing logistics provider; mailing tracking provider; and mailing information manager. A business entity whose services define it as a mailing agent may subscribe as a mail owner, but only for its own mail or the mail of its corporate partners or subsidiaries. A business entity who subscribes as a mail owner under these conditions may separately subscribe as a mailing agent.

Also, the Confirm-based Preshipment Notification, i.e., Electronic Mailing Data (EMD) files and Entry Scans, including the process for accepting EMD files and distributing Entry Scans is eliminated. Customers previously submitted EMD files to receive entry scans at the point of mail induction. However, this process was not fully integrated with mail entry procedures and systems, and was not a robust enough system for piece-level data summarization. This reduced the potential validity of a Confirm Entry Scan as an accurate “start-the-clock” for service measurement, diagnostics, and customer support purposes. The only valid start-the-clock will be from participation in the Intelligent Mail full-service option, which is scheduled to launch in May.

Personalized Stamped Envelopes

We are offering premium options for personalized stamped envelopes. The premium options include: Pressure-sensitive sealing; 10-point or 12-point font size; and a choice of font style and font color.

Updates for Full-Service Intelligent Mail

The **Federal Register** final rule, published on April 30, 2008, (Volume 73, Number 84, pages 23398–23403), did not include carrier route flats as eligible for full-service Intelligent Mail prices or benefits. We now include some carrier route flats in the full-service option. We provide free start-the-clock information in May 2009 and separate prices in November 2009 for Periodicals, Bound Printed Matter, and Standard Mail carrier route flats (except Standard Mail saturation flats) meeting all full-service requirements. We also provide address information benefits for Periodicals letters and flats meeting all full-service requirements in May 2009.

We are delaying the requirement for all full-service Intelligent Mail mailings to affix pallet placards on the outside of the shrinkwrap from May 2009 until November 2009.

We are also modifying standards that require pink pallet placards for full-service Periodicals mailings to allow a pink identification bar instead of a completely pink background. Although we prefer pallet placards on pink stock, the pink line should provide sufficient visual validation of the class of mail. The DMM changes are effective in May 2009, but mailers who are preparing mailings with Intelligent Mail container placards may use either option immediately.

Move Update Implementation Updates

The Move Update standards effective November 2008 did not include separate prices for mailings that do not meet the new standards. Since Move Update standards apply to presorted, automation, and carrier route mailings, without the establishment of new prices, the proper price for noncompliant mailings is First-Class Mail single-piece regardless of the class of mail originally claimed. Effective May 11, 2009, we are establishing a charge for Standard Mail mailings not meeting Move Update standards of \$0.07 per piece in addition to the applicable Standard Mail postage.

The Postal Service adopts the following changes to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM), incorporated by reference in the *Code of Federal Regulations*. See 39 CFR 111.1.

[Add new item 1.9 to introduce saturation mail volume incentive pricing as follows:]

1.9 Saturation Mail Volume Incentive Program

1.9.1 Basic Program Eligibility

Mailers of Regular and Nonprofit Standard Mail saturation letters under 243.6.5 that demonstrate a verified increase in mailing volume from the prior year (May 11, 2008 to May 10, 2009), qualify for a per-piece credit to postage paid on the incremental volume, recorded during the established program period, under the following conditions:

a. Qualifying mailers may request a credit to the postage paid on the incremental saturation mailing volume under either of the following conditions:
 1. Based on an overall increase in the mailer's total saturation mailing volume.
 2. Based on an increase in the volume of saturation mailpieces destinating to ZIP Codes within a specific sectional center facility (SCF) (or group of SCFs) identified by the mailer.

b. Mailers must be able to demonstrate saturation mail volume in both the 2007 and 2008 calendar years. Mailers applying for a credit to the postage paid on saturation mailpieces within a specific SCF must be able to demonstrate saturation mail volume to ZIP Codes within the specified SCF in both the 2007 and 2008 calendar years.

c. Mailers must be able to demonstrate a minimum of six saturation mailings (or six saturation mailings to a specified SCF) in the 2008 calendar year.

d. Mailers must pay saturation postage through a permit imprint advance deposit account at the time of application and must have a functioning Centralized Account Payment System (CAPS) account prior to the close of the program period.

e. Each permit imprint advance deposit account used for the payment of postage for saturation mailings must be established at a Postal facility having *PostalOne!* capability.

f. Mailers presenting saturation mailpieces within a Negotiated Service Agreement (NSA) or through another Postal Service-sponsored incentive program are not eligible for the saturation mail volume incentive program.

g. Letter-size mailpieces that are not automation-compatible or not barcoded and are mailed at flat-size saturation prices are not eligible for the saturation mail volume incentive program.

1.9.2 Application

Mailers wishing to participate in the saturation mail volume incentive program must submit a letter requesting participation to their district Manager, Business Mail Entry (see the postal

locator link on Postal Explorer at <http://pe.usps.com> for contact information).

a. Mailers must specify their intent to apply for consideration for an overall volume increase under 1.9.1.a1, or for a volume increase to a specific SCF (or group of SCFs) under 1.9.1.a2.

b. Applications must include historical mailing activity demonstrating eligibility for the program as specified under 1.9.1.

c. Applications must specify the mailer's Permit Imprint advance deposit account(s) and Centralized Account Payment System (CAPS) account(s) number(s). Mailers applying for CAPS accounts within the program period must provide their CAPS account number to their district Manager, Business Mail Entry before the end of program period.

d. Applications may be submitted after February 11, 2009, and must be received by the district Manager, Business Mail Entry no later than June 11, 2009.

e. Applications must be completed and submitted by an official of the business or nonprofit entity that owns the mail. For the purposes of participation in this program, an entity that owns the mail is defined as the parent organization. Franchisees that are not separate business entities may not apply for the incentive independently of the parent organization. Printers and mailing agents may not apply for external entities for which they prepare the mail.

1.9.3 Additional Eligibility Standards

Mailers requesting eligibility for a volume increase to a specific SCF (or group of SCFs) under 1.9.1.a2 must submit mailing documentation electronically to the Postal Service using an approved method (e.g. Mail.dat) at the time of application and for the duration of their participation in the program.

1.9.4 Saturation Mail Volume Incentive Credits

Approved program participants demonstrating an increase in saturation mail volume under 1.9 qualify for a per-piece credit to the postage paid on the incremental volume, recorded during the established program period as follows:

a. Standard Mail saturation letters: \$0.037 per piece.

b. Nonprofit Standard Mail saturation letters: \$0.022 per piece.

1.9.5 Incentive Program Period

The program period is annual and begins May 11, 2009. Approved participants demonstrating an increase

in saturation mail volume in accordance with 1.9.0 and otherwise in compliance with the terms of this program, receive a credit to their specified CAPS account after the close of the annual program period.

13.2 Basic Information

13.2.1 Description

[Revise the second sentence of 13.2.1 to read as follows:]

* * * Scanned data can include the postal facility where such pieces are processed, the postal operation used to process the pieces, the date and time when the pieces are processed, and the numeric equivalent of a barcode(s) that help to identify the specific pieces. * * *

* * * * *

13.2.3 Authorization

[Revise 13.2.3 to read as follows:]

Participation in Confirm service requires USPS authorization after mailers pay applicable fees and meet technical requirements. As part of the application process, a mailer must submit mailpieces with the appropriate PLANET Code barcodes, POSTNET barcodes, or Intelligent Mail barcodes for evaluation and approval via the prescribed application process. Mailers may use Confirm service only after receiving authorization. Information generated from the service is provided only to mailers meeting the standards for participation.

* * * * *

[Renumber current item 13.2.7 as new 13.2.8 and add new 13.2.7 as follows:]

13.2.7 Eligibility

Confirm is available to both mail owners and mailing agents. The Bronze and Silver subscriptions are restricted to

mail owners only. Mailing agents are eligible for Gold and Platinum subscriptions at the mailing agent fee level only. Mail owner and mailing agents are defined as follows:

a. Mail Owner. A mail owner is the business entity (or individual) who makes business decisions regarding the mailpiece content, directly benefits from the mailing, and ultimately pays for postage on the mailpiece.

b. Mailing Agent. A mailing agent is a business entity acting on behalf of one or more mail owners by providing mailing services for which the mail owners will compensate the mailing agent. Mailing Agents include, but are not limited to: printer; letter shop; address list provider/manager; mail preparer; postage payment provider; mailing logistics provider; mailing tracking provider; and mailing information manager. A business entity whose services define it as a mailing agent may subscribe as a mail owner, but only for its own mail, or the mail of its corporate partners or subsidiaries. A business entity who subscribes as a mail owner under these conditions may separately subscribe as a mailing agent.

13.2.8 Subscription Levels

[Revise renumbered 13.2.8 to read as follows:]

A customer may subscribe to one or more of the following levels at the same time, at different times, or at overlapping times:

a. Bronze Subscription. The Bronze subscription level is restricted to mail owners (see 13.2.7), has a term of 12 consecutive months, includes

registration of one identification code assigned by the USPS, and provides up to 200,000 scans. A mail owner subscribing to this level may also:

1. Register additional identification codes for a term of 3 consecutive months or until the expiration of the underlying subscription, whichever occurs first.

2. License additional scans in blocks of 10,000 scans at any time before the underlying subscription expires. Unused scans expire at the end of the subscription term.

3. Change the subscription level to a Gold or Platinum subscription level at any time before the expiration of the Bronze subscription by paying the difference of the respective subscription fees. This change in service level does not extend the term of the underlying initial subscription.

b. Silver Subscription. The Silver subscription level is restricted to mail owners (see 13.2.7), has a term of 3 consecutive months, includes registration of one identification code assigned by the USPS, and provides up to 15 million scans. A mail owner subscribing to this level may also:

1. Register additional identification codes for a term of 3 consecutive months or until the expiration of the underlying subscription, whichever occurs first.

2. License additional scans in blocks of 2 million scans at any time before the underlying subscription expires. Unused scans expire at the end of the subscription term.

c. Gold Subscription. The Gold subscription level has a term of 12

consecutive months, includes registration of one identification code assigned by the USPS, and provides up to 50 million scans. A customer subscribing to this level may also:

- 1. Register additional identification codes for a term of 3 consecutive months or until the expiration of the underlying subscription, whichever occurs first.
- 2. License additional scans in blocks of 6 million scans at any time before the underlying subscription expires. Unused scans expire at the end of the subscription term.
- 3. Raise the subscription level to a Platinum subscription level at any time before the expiration of the Gold subscription by paying the difference of the respective subscription fees. This change in service level does not extend the term of the underlying initial subscription.

d. Platinum Subscription. The Platinum subscription level has a term of 12 consecutive months, includes registration of three identification numbers assigned by the USPS, and provides an unlimited number of scans. A customer subscribing to this level may also license additional identification codes for a term of 3 consecutive months or until the

expiration of the underlying subscription, whichever occurs first.

[Revise items g and h of 8.10.3 by deleting “or L603” in the third sentence in each item and deleting the entire sixth sentence that contains reference to obsolete L604.]

[Revise heading and introductory text of 8.10.6 as follows:]

8.10.6 Package Services, Parcel Select

Pallets must be prepared under 8.0 in the sequence listed below and completed at each required level before the next optional or required level is prepared. Unless indicated as optional, all sort levels are required under the conditions shown. At the mailer's option, Parcel Select and Parcel Post mailings may be prepared on pallets under this section. Destination entry price eligibility applies only to Parcel Select (see 456), and Bound Printed Matter (see 466). Combined mailings of Standard Mail, Parcel Select, and Package Services machinable parcels

also must meet the standards in 6.0 or 20.0. Pallets must be labeled according to the Line 1 and Line 2 information listed below and under 8.6.

* * * * *

[Insert new 8.10.7 and renumber current 8.10.7 and 8.10.8 as new 8.10.8 and 8.10.9 as follows:]

8.10.7 Standard Mail Machinable Parcels and Not Flat-Machinable Pieces Weighing 6 Ounces or More

Mailers who palletize machinable parcels or Not Flat-Machinable pieces must make pallets or pallet boxes when there are 250 pounds or more for the destination levels below for DMBC, DSCF, or DDU prices. When prepared at origin, a 200-pound minimum is required for the BMC price. Pallets must be prepared under 8.0 in the sequence listed below and completed at each required level before the next optional or required level is prepared. Unless indicated as optional, all sort levels are required under the conditions shown. At the mailer's option, Parcel Select and Parcel Post mailings may be prepared on pallets under this section. Destination entry price eligibility applies only to Standard Mail (see 446 for parcels and NFMs that weigh 6 ounces or more). Combined mailings of Standard Mail, Parcel Select, and Package Services machinable parcels also must meet the standards in 6.0 or 20.0. Pallets must be labeled according to the Line 1 and Line 2 information listed below and under 8.6.

a. 5-digit scheme, required. Pallet must contain parcels or NFMs for the same 5-digit scheme under L606. For 5-digit destinations not part of L606, or for which scheme sorts are not performed, 5-digit pallets are prepared under 8.10.6b. Labeling:

1. Line 1: Use L606.

2. Line 2: “STD MACH 5D,” or “STD NFM MACH 5D,” as applicable; followed by “SCHEME” (or “SCH”).

b. 5-digit, required. Pallet must contain parcels or NFMs only for the same 5-digit ZIP Code. Labeling:

1. Line 1: city, state, and 5-digit ZIP Code destination (see 8.6.4c for overseas military mail).

2. Line 2: “STD MACH 5D,” or “STD NFM MACH 5D,” as applicable.

c. ASF, optional, but required for DBMC prices. Not available for the Buffalo NY ASF in L602. Pallets must contain only parcels or NFMs for the 3-digit ZIP Code groups in L602. Labeling:

1. Line 1: Use L602.

2. Line 2: “STD MACH ASF,” or “STD NFM MACH ASF,” as applicable.

d. BMC, required. Pallets must contain only parcels or NFMs for the 3-digit ZIP Code groups in L601. Labeling:

1. Line 1: Use L601.

2. Line 2: “STD MACH BMC,” or “STD NFM MACH BMC,” as applicable.

e. Origin Mixed BMC (required); no minimum; labeling:

1. Line 1: L601, Column B.

2. Line 2: “STD MACH WKG,” or “STD NFM MACH WKG,” as applicable.

f. Mixed BMC, optional. Labeling:

1. Line 1: “MXD” followed by information in L601, Column B, for BMC serving 3-digit ZIP Code prefix of entry Post Office (or labeled to plant serving entry Post Office if authorized by processing and distribution manager).

2. Line 2: “STD MACH WKG,” or “STD NFM MACH WKG,” as applicable.

[Revise the first sentence in renumbered 8.10.8, and add a new second sentence as follows:]

8.10.8 Standard Mail Irregular Parcels Weighing 2 Ounces or More

Mailers who palletize unbundled or unsacked irregular parcels must make pallets or pallet boxes when there are 250 pounds or more for the destination levels below for DMBC, DSCF, or DDU prices. When prepared at origin, a 200 pound minimum is required for the BMC price. * * *

[Revise items a through e and add new item f as follows:]

a. 5-digit scheme, required. Pallet or pallet box must contain parcels only for the same 5-digit scheme under L606. Mailers may combine NFMs weighing under 6 ounces with irregular parcels under 8.10.7. For 5-digit destinations not part of L606 prepare 5-digit pallets under 8.10.6b. Labeling:

1. Line 1: Use L606.

2. Line 2: “STD IRREG 5D; followed by “SCHEME” (or “SCH”).

b. 5-digit, required. Pallet or pallet box must contain parcels only for the same 5-digit ZIP Code. Labeling:

1. Line 1: city, state, and 5-digit ZIP Code destination (see 8.6.4c for overseas military mail).

2. Line 2: “STD IRREG 5D.”

c. SCF, required. Allowed only for mail deposited at a DSCF to claim SCF price; labeling:

1. For Line 1, L002, Column C.

2. For Line 2, “STD IRREG SCF.”

d. ASF, optional, but required for DBMC prices. Not available for the Buffalo NY ASF in L602. Pallets must contain only parcels or NFMs for the 3-digit ZIP Code groups in L602. Labeling:

1. Line 1: Use L602.

2. Line 2: “STD IRREG ASF.”

e. BMC, required. Pallets must contain only parcels or NFMs for the 3-digit ZIP Code groups in L601. Labeling:

1. Line 1: Use L601.
2. Line 2: "STD MACH BMC," "STD IREG BMC".

f. Origin Mixed BMC (required); no minimum; labeling:

g. Mixed BMC, optional. Labeling:
1. Line 1: "MXD" followed by information in L601, Column B, for BMC serving 3-digit ZIP Code prefix of entry Post Office (or labeled to plant serving entry Post Office if authorized by processing and distribution manager).

2. Line 2: "STD IREG WKG".

[Revise the first sentence in renumbered 8.10.9, and add a new second sentence as follows:]

8.10.9 Standard Mail Not Flat-Machinable Pieces Weighing Less Than 6 Ounces

Mailers must prepare pieces on pallets or in pallet boxes when there are 250 pounds or more of NFMs for the destination levels below for DMBC, DSCF, or DDU prices. When prepared at origin, a 200 pound minimum is required for the BMC price. * * *

[Revise items a through e and add new item f as follows:]

a. 5-digit scheme, required. Pallet or pallet box must contain NFMs only for the same 5-digit scheme under L606. For 5-digit destinations not part of L606 prepare 5-digit pallets under 8.10.7b. Labeling:

1. Line 1: Use L606.
2. Line 2: "STD NFM 5D"; followed by "SCHEME" (or "SCH").

b. 5-digit, required. Pallet or pallet box must contain NFMs only for the same 5-digit ZIP Code. Labeling:

1. Line 1: city, state, and 5-digit ZIP Code destination (see 8.6.4c for overseas military mail).

2. Line 2: "STD NFM 5D."

[Add new 705.22 to describe the conditions for the Intelligent Mail full-service automation option originally published in August 2008 Federal Register final rule as follows:]

22.0 Full-Service Automation Option

22.1 Description

Access to full-service automation option benefits requires the use of Intelligent Mail barcodes to uniquely identify each mailpiece. In addition to the standards described in 22.2, all pieces entered under the full-service option must individually meet the eligibility requirements for automation prices according to their class and shape. Full-service automation mailings require Intelligent Mail barcodes on mailpieces; Intelligent Mail tray labels on trays and sacks; and Intelligent Mail container placards on pallets or similar containers (when created). Additional requirements include the use of an approved electronic method to transmit postage statements and mailing documentation to the USPS (describing how mailpieces are linked to trays or sacks, and containers, if applicable) and scheduling dropship appointments through the Facility Access and Shipment System (FAST) for destination bulk mail center, destination area distribution center, and destination sectional center facility dropshipments.

22.1.1 Basic Option Pieces Included in Full-Service Automation Mailings

Full-service automation option mailings may include pieces prepared under the basic automation option, but the basic automation option pieces will not be used to meet the eligibility standards for the full-service option and will not receive full-service benefits. Basic automation option pieces bear Intelligent Mail barcodes (under 708.4.0) and meet all eligibility requirements for automation prices.

22.1.2 POSTNET Pieces Included in Full-Service Automation Mailings

Full-service automation option mailings may include automation-compatible pieces bearing POSTNET barcodes. These pieces may not be used to meet the eligibility standards for the full-service option and will not receive full-service benefits.

22.2 Eligibility Standards

[The following introductory text of 22.2 is revised from the Federal Register final rule published August 2008.]

First-Class Mail, Periodicals, and Standard Mail letters and flats and Bound Printed Matter flats meeting eligibility requirements for automation or carrier route prices, except for Standard Mail ECR saturation flats or Standard Mail ECR letters paying ECR flats prices, are eligible for the full-service automation option.

All pieces entered under the full-service automation option must:

a. Bear a unique Intelligent Mail barcode.

b. Be part of a mailing using unique Intelligent Mail tray labels on all trays and sacks.

c. Be part of a mailing using unique Intelligent Mail container barcodes on all destination-entry pallets and other containers prepared under 705.8.0 or as part of a customer/supplier agreement. A customer/supplier agreement is authorized with a service agreement signed by the mailer, the USPS District Manager, Customer Service, and the USPS Processing and Distribution Center manager. The service agreement contains provisions regarding mailer and USPS responsibilities.

d. Be part of a mailing using an approved electronic method to transmit a postage statement and mailing documentation to the *PostalOne!* system.

e. Be scheduled for an appointment through the Facility Access and Shipment Tracking (FAST) system when deposited as a DBMC, DADC, or DSCF drop-shipment.

22.3 Preparation

22.3.1 Intelligent Mail Barcodes

Mailers must include an Intelligent Mail barcode on each mailpiece as described in 708.4 that accurately encodes the following fields:

a. Barcode ID.

b. Service Type ID.

c. Mailer ID. At the option of the mail owner, the Mailer ID field can be populated with the Mailer ID of the mail owner or mail preparer.

d. Serial number. Except for mail prepared under 22.4.3, each mailpiece must be encoded with a unique serial number. Mailers must ensure that these numbers remain unique for a period of at least 45 days. Serial numbers associated to an individual Mailer ID must not be duplicated within this 45-day period, regardless of the entry location.

e. Delivery point routing code. All Intelligent Mail barcodes must include an accurate delivery point routing code.

22.3.2 Intelligent Mail Tray Labels

All trays and sacks must contain accurately encoded Intelligent Mail tray labels as described in 708.6.5. Mailing documentation, when required, must associate each mailpiece to a corresponding tray or sack, if applicable, as described in 22.3.4. Each tray or sack must be encoded with a unique serial number. Tray or sack serial numbers associated to an individual Mailer ID cannot be duplicated within a 45-day period, regardless of the acceptance location.

22.3.3 Intelligent Mail Container Placards

All required pallets and similar containers (such as all-purpose containers, hampers, and gaylords) and all containers prepared under 705.8.0 in full-service mailings must display container placards that include accurately encoded Intelligent Mail container barcodes as described in 708.6.6. Mailing documentation, when required, must associate each mailpiece (and tray or sack, if applicable) to a corresponding container as described in 22.3.4, unless otherwise authorized by the USPS. Each container must be encoded with a unique serial number. Container barcodes must not be duplicated within a 45-day period, regardless of the acceptance location.

22.3.4 Electronic Documentation

Mailers must electronically submit postage statements and mailing documentation (when required) to the *PostalOne!* system. Unless otherwise authorized, documentation must describe how each mailpiece is linked to a uniquely identified tray or sack, if applicable, and how each mailpiece and tray or sack is linked to a uniquely identified container (if applicable). The documentation must also meet the requirements in *A Guide to Intelligent Mail for Letters and Flats* (available at ribbs.usps.gov/). Mailers must transmit postage statements and mailing documentation to the *PostalOne!* system using Mail.dat, Mail.XML, or Postal Wizard (see 22.4.3).

22.3.5 Scheduling Appointments

Mailers must schedule appointments using the Facility Access and Shipment Tracking (FAST) system for dropship mailings (except for mailings entered at a DDU) or as required in a customer/supplier agreement. Mailers may schedule appointments online using the FAST Web site at fast.usps.com or they

may submit appointment requests through *PostalOne!* FAST Web Services at www.uspspostalone.com, using Mail.XML or Mail.XML with Mail.dat.

22.3.6 Preparation of Containers

Mailings under the full-service automation option may be containerized, when volume warrants, in uniquely identified containers by palletizing bundles, sacks, or trays under standards in 705.8. Mailers required to containerize must make all separations when the volume for any presort level meets a required sortation level, as described in 705.8.5.2 or in the customer/supplier agreement. Full-service mailings containerized under 705.8.0 or as part of a customer/supplier agreement must have Intelligent Mail container placards (under 708.6.6) on the containers.

22.4 Additional Standards

22.4.1 Induction Data

Mailers presenting mailings under the full-service automation option will receive mail induction information (start-the-clock data corresponding to the date and time when the USPS receives the mailing) at no additional charge.

22.4.2 Address Correction Notices

*[The following introductory text of 22.4.2 is revised from the **Federal Register** final rule published August 2008.]*

Mailers presenting mailpieces (except for those noted below) that qualify for the full-service option will receive automated address correction notices when the pieces are encoded with Intelligent Mail barcodes with "Address Service Requested" or "Change Service Requested" under standards for OneCode ACS and under the following conditions:

a. Address correction notices will be provided at no additional charge for letters and flats eligible for the full-service option, except for Standard Mail ECR flats, BPM flats dropshipped to DDUs, or BPM carrier route flats.

b. Mailpieces must include the appropriate service type ID in the Intelligent Mail barcode to match the ancillary service requested. See 507.1.5 for mail disposition and address correction combinations by class of mail.

c. A complementary ancillary service request option also must be recorded in the mailer's Address Change Service (ACS) mailer profile. See 507.4.2 for more information about ACS. Address correction notices for mailpieces in full-service mailings are available for:

1. First-Class Mail letters and flats, provided at no charge (printed endorsement not required for letters).

2. Periodicals letters and flats, provided at no charge up to 60 days from first notice (printed endorsement not required). See 507.4.1.1 for charges after 60 days.

3. Standard Mail letters and flats and BPM flats, provided at no charge up to 30 days from first notice. See 507.4.1.1 for charges after 30 days. Standard Mail and BPM pieces must include a printed on-piece endorsement in addition to encoding the ancillary service request into the Intelligent Mail barcode. See 507.4.2 for additional standards.

d. Mailers must use the address correction information provided by the USPS to update their address records in order to receive notices without paying additional fees.

22.4.3 Special Standards—Small Volume Mailings

For mailings of fewer than 10,000 pieces, and postage is affixed to each piece at the correct price or each piece is of identical weight and the mailpieces are separated by price, the serial number field of each Intelligent Mail barcode can be populated with a mailing serial number that is unique to the mailing but common to all pieces in the mailing. This unique mailing serial number must not be reused for a period of 45 days from the date of mailing. These mailings are not required to submit electronic documentation for full-service, only an electronic postage statement. Unique mailing serial numbers must be populated in the Postal Wizard entry screen field or in the Mail.XML messages. Mailers must populate the serial number field of all Intelligent Mail tray or sack labels, and Intelligent Mail container barcodes (when mailings are containerized) with the unique mailing serial number.

13.0 Carrier Route Eligibility

[Renumber current 13.4 as new 13.5, add new 13.4 as follows:]

13.4 Full-Service Intelligent Mail Eligibility Standards

In addition to other requirements in 6.0, carrier route letters and flats eligible for full-service Intelligent Mail prices (in November 2009) and address correction benefits under 705.22.4.2 must:

a. For carrier route letter, be letter-size under 201.1.0.

b. For carrier route flats, be flat-size under 301.1.0.

c. Be part of a carrier route mailing.
d. Bear an accurate Intelligent Mail barcode encoded with the correct delivery point routing code matching the delivery address and meeting the standards in 202.5.0 (for letters), 302.4.0 (for flats), and 708.4.0. Letters or flats with Intelligent Mail barcodes entered under the full-service automation option also must be part of mailings that meet the standards in 705.22.

14.0 Barcoded (Automation) Price Eligibility

14.1 Basic Standards

14.1.1 General

All pieces in a Periodicals barcoded (automation) price mailing must:

* * * * *

[Revise item c of 14.1.1 to describe new standards for barcoded Periodicals mailings as follows:]

c. Bear an accurate delivery point POSTNET barcode or an Intelligent Mail barcode encoded with the delivery point routing code, matching the delivery address and meeting the standards in 202.5.0 (for letters), 302.4.0 (for flats), and 708.4.0. Mailers must apply the barcode either on the piece or on an insert showing through a window.

a. Affixed placard measuring at least 8 inches by 11 inches. See 6.6.3 for placard specifications and 6.6.5 placard placement.

b. Optional self-adhesive placard measuring at least 4 inches by 7 inches. Placards may be prepared in the optional format (see 6.6.6) affixed to the outside of any shrinkwrap or plastic by a self-adhesive or other adhesive means.

* * * * *

6.6.5 Placard Requirements

Mailers using placards bearing Intelligent Mail container barcodes must:

[Revise item a to reflect that pallet placards bearing Intelligent Mail container barcodes do not need to be self-adhesive and affixed to the outside of the plastic wrap until November 29, 2009 by revising the 2nd sentence and adding a new 3rd sentence as follows:]

a. * * * Prior to November 29, 2009, placards measuring at least 8 inches by

11 inches may be affixed to pallets under 705.8.6.1. Effective November 29, 2009, placards must be affixed by self-adhesive or other adhesive means that will not obscure any required element of the placard and remain secure throughout USPS processing.
