SUPPLEMENTARY INFORMATION:

Title: Understanding Glacier National Park Visitors' Beliefs about Climate Change.

Bureau Form Number(s): None.

OMB Number: To be requested.

Expiration Date: To be requested.

Type of Request: New Collection.

Description of Need: The National Park Service (NPS) Organic Act of 1916, as amended and supplemented, 16 U.S.C. 1, *et seq.*, requires that the NPS preserve national parks for the use and enjoyment of present and future generations. Climate change may significantly impact the conditions in Glacier National Park (GNP), which

among other predicted impacts, may lose its glaciers in the next twenty-five years. In order to develop effective responses to climate change impacts on both natural resources and visitor experiences in GNP, park managers need better information on what park visitors believe about climate change, the connections they make between climate change and GNP, and strategies to effectively educate park visitors about climate change and ways to reduce its impacts.

The NPS and GNP are currently developing a range of responses to climate change including educational programming. A centerpiece of these education programs is the Do Your Part for Climate Friendly Parks initiative, which asks park visitors to assess their personal contribution to climate change and then make commitments to lower their carbon footprint to help protect a national park of their choice from the impacts of climate change. This website was launched in the summer of 2008. GNP visitors may be a prime audience for this website, as melting glaciers in the park is one of the more obvious symbols of climate change impacts in the National Park System. However, more information is needed about visitors' beliefs about climate change to make this website as effective as possible. In addition, GNP implemented a mass transit system in the summer of 2007 as part of a major reconstruction of the Going to the Sun Road. Surveys of visitor attitudes about the shuttles found that a large percentage of GNP shuttle riders chose to ride the shuttle to protect the environment of the park. However, further understanding of the connections people make between protecting the environment, reducing climate change and mass transit in general and the GNP shuttle in particular will help park managers develop more effective climate change response and education strategies.

The primary objectives of this research are to provide information that will assist the GNP staff in developing climate change education programming and to develop recommendations for improving the Do Your Part for Climate Friendly Parks initiative. Specifically, this research will seek to understand the connections visitors make between riding the shuttle, protecting the environment of Glacier National Park (GNP), and reducing potential impacts of climate change on GNP, and to assess their awareness of and willingness to utilize the planned Do Your Part for Climate Friendly Parks Web-based initiative.

Automated data collection: This information will be collected by on-site,

through self completed surveys. No automated data collection will be used. Responding is voluntary.

Description of respondents: Visitors to Glacier National Park who visit between July 1, 2009, and August 31, 2009.

Estimated average number of respondents: We will contact 550 individuals stratified by weekend and weekday periods and expect 495, or 90 percent, to agree to respond.

Estimated average number of responses: We expect to collect 495 completed surveys.

Estimated average time burden per respondent: 1 minute for non-respondents and 5 minutes for respondents.

Frequency of Response: 1 time per respondent.

Estimated total annual reporting burden: 50 hours per year.

Comments are invited on: (1) The practical utility of the information being gathered; (2) the accuracy of the burden hour estimate; (3) ways to enhance the quality, utility, and clarity of the information being collected; and (4) ways to minimize the burden to respondents, including use of automated information collection techniques or other forms of information technology. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: February 11, 2009.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-623]

In the Matter of Certain R-134a Coolant (Otherwise Known as 1,1,1,2-Tetrafluoroethane); Enforcement Proceeding; Order

The Commission instituted this investigation on December 31, 2007, based on a complaint filed by INEOS Fluor Holdings Ltd., INEOS Fluor Ltd., and INEOS Fluor Americas L.L.C. (“INEOS”). The complaint alleged violations of section 337 of the Tariff

Act of 1930 (19 U.S.C. 1337) in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain R-134a coolant (otherwise known as 1,1,1,2-tetrafluoroethane) by reason of infringement of various claims of United States Patent No. 5,744,658. Complainants subsequently added allegations of infringement with regard to United States Patent Nos. 5,382,722 and 5,559,276. The complaint named two respondents, Sinochem Modern Environmental Protection Chemicals (Xi'an) Co., Ltd. and Sinochem Ningbo Ltd. Two additional respondents were subsequently added: Sinochem Environmental Protection Chemicals (Taicang) Co., Ltd. and Sinochem (U.S.A.) Inc.

On August 18, 2008, respondents moved for partial termination of the investigation based on the entry of a consent order specific to respondents' “old” process. On August 20, 2008, the administrative law judge (“ALJ”) issued an initial determination (“ID”) granting the motion and terminating the investigation with respect to the “old” process. On September 11, 2008, the Commission issued notice of its decision not to review the ID and issued the subject consent order.

On December 12, 2008, INEOS filed a complaint, requesting that the Commission institute a formal enforcement proceeding under Commission Rule 210.75 to investigate an alleged violation of the consent order relating to the “old” process. The complaint named a single respondent, Sinochem Environmental Protection Chemicals (Taicang) Co. Ltd. (“Sinochem (Taicang)”).

Having examined INEOS's complaint seeking a formal enforcement proceeding and having found that the complaint complies with the requirements for institution of formal enforcement proceedings in accordance with Commission Rule 210.75, the Commission has determined to institute a formal enforcement proceeding to determine whether Sinochem (Taicang) is in violation of the Commission's consent order in the above-captioned investigation, and what, if any, enforcement measures are appropriate.

Accordingly, the Commission hereby orders that:

1. Pursuant to Commission Rule 210.75(b), 19 CFR 210.75(b), a formal enforcement proceeding is instituted to determine whether Sinochem Environmental Protection Chemicals (Taicang) Co. Ltd. is in violation of the Commission's consent order issued in the above-captioned investigation, and
