Title: Exclusion Determinations for New Non-road Spark-Ignited Engines, New Non-road Compression-Ignited Engines and New On-Road Heavy Duty Engines (Renewal).

ICR numbers: EPA ICR No. 1852.04, OMB Control No. 2060-0395.

ICR Status: This ICR is scheduled to expire on February 28, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Under the provisions of the Clean Air Act (Act), the Administrator is required to promulgate regulations to control air pollutant emissions from "motor vehicles" and "non-road engines," as defined in the Act. Motor vehicles and non-road engines not meeting the applicable definitions are excluded from compliance with current regulations.

A manufacturer may make an exclusion determination by itself; however, manufacturers and importers may routinely request EPA to make such determination to ensure that their determination does not differ from the Agency's. To request an exclusion determination, manufacturers submit a letter with a description of the engine and/or vehicle (engine type, horsepower rating, intended usage etc.) and sales brochures to EPA. EPA uses this information to determine whether the engine or vehicle is excluded from compliance with one or more emission regulations. EPA then stores the data in its internal files, and makes it available to environmental groups and the public upon request under the Freedom of Information Act.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 6 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions;

develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Light Truck and Utility Vehicle Manufacturers; Heavy Duty Truck Manufacturers; Gasoline Engine and Engine Parts Manufacturers; Construction Machinery Manufacturers; Industrial Truck, Tractor, Trailer, and Stacker Machinery Manufacturers; Marine Engine Manufacturers; Other Engine Equipment Manufacturers.

Estimated Number of Respondents: 12.

Frequency of Response: Annual and On Occasion.

Estimated Total Annual Hour Burden: 69.

Estimated Total Annual Cost: \$6,254, which includes \$116 annualized capital or O&M costs.

Changes in the Estimates: There is no change in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens.

Dated: February 18, 2009.

What Information is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of
