Proposals to approve under OMB delegated authority the extension for three years, without revision, of the following reports:

1. **Report title:** The Senior Loan Officer Opinion Survey on Bank Lending Practices.

Agency form number: FR 2018.

OMB control number: 7100-0058.

Frequency: Up to six times a year.

Reporters: Large U.S. commercial banks and large U.S. branches and agencies of foreign banks.

Annual reporting hours: 1,008 hours.

Estimated average hours per response: 2 hours.

Number of respondents: 84.

Small businesses are not affected.

General description of report: This information collection is voluntary (12 U.S.C. 225a, 248(a)(2), and 3105(c)(2)) and is given confidential treatment (5 U.S.C. 552(b)(4)).

Abstract: The FR 2018 is conducted with a senior loan officer at each respondent bank, generally through a

telephone interview, up to six times a year. The purpose of the survey is to provide qualitative and limited quantitative information on credit availability and demand, as well as evolving developments and lending practices in the U.S. loan markets. Consequently, a portion of the questions in each survey typically covers special topics of timely interest. There is the option to survey other types of respondents (such as other depository institutions, bank holding companies, or other financial entities) should the need arise. The FR 2018 survey provides crucial information for monitoring and understanding the evolution of lending practices at banks and developments in credit markets.

2. **Report title:** Senior Financial Officer Survey.

Agency form number: FR 2023.

OMB control number: 7100-0223.

Frequency: Up to four times per year.

Reporters: Large commercial banks.

Annual reporting hours: 240 hours.
Estimated average hours per response: 1 hour.

Number of respondents: 60.

Small businesses are not affected.

General description of report: This information collection is voluntary (12 U.S.C. 225a, 248(a), and 263). It has been anticipated that most, if not all, of the information to be collected on the FR 2023 would be exempt from disclosure under subsection (b)(4) of the Freedom of Information Act (5 U.S.C. 552(b)(4)). However, the confidentiality status of the survey would be determined on a case-by-case basis, when the specific questions to be asked on each particular survey are formulated but before respondents are contacted. Respondents will be informed of the confidentiality status of that particular survey, each time the survey would be conducted.

Abstract: The FR 2023 collects qualitative and limited quantitative information about liability management, the provision of financial services, and the functioning of key financial markets from a selection of sixty large commercial banks (or, if appropriate, from other depository institutions or major financial market participants). Responses are obtained from a senior officer at each participating institution through a telephone interview. The survey is conducted when major informational needs arise and cannot be met from existing data sources. The survey does not have a fixed set of questions; each survey consists of a limited number of questions directed at topics of timely interest. The survey helps pinpoint developing trends in bank funding practices, enabling the

Federal Reserve to distinguish these trends from transitory phenomena.

3. *Report titles:* Quarterly Report of Interest Rates on Selected Direct Consumer Installment Loans and Quarterly Report of Credit Card Plans.

Agency form numbers: FR 2835 and FR 2835a.

OMB control number: 7100-0085.

Frequency: Quarterly.

Reporters: Commercial banks.

Annual reporting hours: FR 2835, 132 hours; and FR 2835a, 100 hours.

Estimated average hours per response: FR 2835, 13.2 minutes; and FR 2835a, 30 minutes.

Number of respondents: FR 2835, 150; and FR 2835a, 50.

Small businesses are not affected.

General description of report: These information collections are voluntary (12 U.S.C. 248(a)(2)). The FR 2835a individual respondent data are given confidential treatment (5 U.S.C. 552(b)(4)), the FR 2835 data however, is not given confidential treatment.

Abstract: The FR 2835 collects the most common interest rate charged at a sample of 150 commercial banks on two types of consumer loans made in a given week each quarter: new auto loans and other loans for consumer goods and personal expenditures.

The FR 2835a collects information on two measures of credit card interest rates from a sample of 50 commercial banks (authorized panel size), selected to include banks with \$1 billion or more in credit card receivables, and a representative group of smaller issuers. The data are representative of interest rates paid by consumers on bank credit cards because the panel includes virtually all large issuers and an appropriate sample of other issuers.

Deputy Secretary of the Board.

SUPPLEMENTARY INFORMATION:

Proposed Project

Colorado Regional Health Information Exchange (CORHIO)—Point of Care Exchange System Evaluation: Point of Care Questionnaires and Focus Groups

AHRQ proposes a case study of the point-of-care (POC) clinical exchange system at the Colorado Regional Health Information Exchange (COHRIO). The COHRIO is an AHRQ State and Regional Demonstration Project contract which supports the administrative and technical implementation of an information technology service to provide secure electronic transmission of clinical information between partner health care entities to improve the efficiency, quality, and safety of patient care.

The key element of CORHIO is the POC clinical exchange system, which doctors can use to access information about individual patients as they care for them. The POC clinical exchange system is an Internet-based portal which allows authorized users to log in and request clinical information for a specific patient. The POC clinical

exchange system is composed of two functions: The patient search function and the data exchange function. The patient search function is supported by the CORHIO master patient index, which is an index of all the patients that have been seen within a given time period at CORHIO’s partner health care organizations (HCOs). The patient search function allows users to enter identifying information for a patient, such as name, date of birth, or medical record number, and searches to determine if the patient has received medical care at one of the partner HCOs. The POC clinical exchange system will then display all potential matching identities available at the CORHIO partner HCOs. Users select the appropriate match, if it exists, and request available data for the selected patient. The data exchange function aggregates and displays the available data from multiple partner HCOs for the selected patient.

This proposed information collection will provide input from clinicians at four participating HCOs regarding the usability of the system and the value of the exchanged clinical information to inform decision-making, patient disposition and potentially redundant test ordering. Additionally, this case study will provide important information to inform future design and phase implementation of the CORHIO system.

This case study is being conducted pursuant to AHRQ’s statutory mandate to conduct and support research, evaluations and initiatives to advance the creation of effective linkages between various sources of health information, including the development of information networks (42 U.S.C. 299b-3(a)(3)).

Method of Collection

This case study includes 2 distinct data collections regarding the POC clinical exchange system:

1. POC Questionnaire—a survey of end-users at three emergency departments (ED) regarding their experiences with the POC clinical exchange system and its effect on patient care. This questionnaire will be used to collect data from the EDs for one week quarterly in 2009 and for the first quarter of 2010.

2. Focus Groups—focus groups with select high- and low-use users of the POC clinical exchange system from each of the three EDs and one call center. Focus groups will be conducted at 4 and 8 months after users begin using the POC system.
