SUPPLEMENTARY INFORMATION:

1. Background

Since 1995, the U.S. Congress has appropriated over USD 660 million to USDOL's OCFT for efforts to combat exploitive child labor internationally. This funding has been used to support technical cooperation projects to combat exploitive child labor, including the worst forms of child labor, in more than 75 countries worldwide. Technical cooperation projects funded by USDOL's OCFT range from direct action programs targeting specific sectors of work to more comprehensive programs that support national efforts to eliminate the worst forms of child labor as defined by ILO Convention 182. USDOL-funded projects generally seek to achieve five major goals:

1. Withdrawing and preventing children from involvement in exploitive child labor through the provision of direct educational services;
2. Strengthening policies on child labor and education, the capacity of national institutions to combat child labor, and formal and transitional education systems that encourage children engaged in, or at risk of engaging in, exploitive child labor to attend school;
3. Raising awareness of the importance of education for all children and mobilizing a wide array of actors to improve and expand education infrastructures;
4. Supporting research and the collection of reliable data on child labor; and
5. Ensuring the long-term sustainability of these efforts.

Since 2001, USDOL-funded projects have withdrawn or prevented over 1 million children from exploitive labor.

In preparation for possible future solicitations for cooperative agreement applications, OCFT is requesting comments regarding these past SGAs and suggestions for possible improvements. All comments received

will be taken into consideration by ILAB's OCFT in the development of future SGAs for child labor and education projects.
