

understand how various program and administrative practices affect TAA performance, including the types of collaboration and administrative arrangements through which TAA operates in the One-Stop Career Center system under the Workforce Investment Act (WIA).

An extension of the ICR is needed in order to obtain follow-up data on

employment and earnings outcomes. In order to complete the study prior to the expiration date of funds for the evaluation, only a single follow-up survey will be conducted in 2010, as approved by OMB (in an NOA, ICR Reference Number 2008–12–1205–001, dated December 17, 2008) in lieu of the two follow-up surveys as originally planned. The burden for this data

collection will therefore be lower than proposed under the first ICR, even though the sample has been slightly expanded in order to assure a sufficient number of responses, due to lower-than-anticipated response rates for different subgroups.

Below is table which shows the burden for different respondents.

RESPONDENT HOURS BURDEN FOR THE TAA EVALUATION

Activity	Total respondents	Frequency	Average minutes per response	Burden hours
Burden Under the Proposed Extension (November 2009 to Project Completion)				
Impact Analysis:				
State Administrative Data	26	Once	480	208
25-Month Follow-up Survey	3,540	One time	30	1,770
Process Analysis:				
Administration of Site Visit Protocols				
1. TAA Reauthorization	180	One time	100	300
2. Promising Practices	325	One time	100	542
Total Estimated Burden				9,236

II. Review Focus

The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Actions

Type of Review: Extension with revisions.

Title: Impact Evaluation of the Trade Adjustment Assistance Program.

OMB Number: 1205–0460.

Affected Public: Individuals in the TAA program or who applied for UI benefits, and State and local administrators in the UI and WIA programs.

Form: Questionnaire and site visit protocols.

Total Respondents: See table above.

Frequency: Once.

Total Responses: See table above.

Average Time per Response: See table above.

Estimated Total Burden Hours: See table above.

Total Burden Cost: \$0.

Comments submitted in response to this comment request will be summarized and/or included in the request for OMB approval of the information collection request; they will also become a matter of public record.

Dated: March 23, 2009.

Thomas M. Dowd,

Administrator, Office of Policy Development and Research, Employment and Training Administration.

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Proposed Collection, Comment Request

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed

and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The Bureau of Labor Statistics (BLS) is soliciting comments concerning the proposed revision to the “American Time Use Survey (ATUS).” A copy of the proposed information collection request (ICR) can be obtained by contacting the individuals listed below in the Addresses section of this notice.

DATES: Written comments must be submitted to the office listed in the Addresses section of this notice on or before May 29, 2009.

ADDRESSES: Send comments to Carol Rowan, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room 4080, 2 Massachusetts Avenue, NE., Washington, DC 20212, 202–691–7628. (This is not a toll free number.)

FOR FURTHER INFORMATION CONTACT: Carol Rowan, BLS Clearance Officer, 202–691–7628. (See **ADDRESSES** section.)

SUPPLEMENTARY INFORMATION:

I. Background

The ATUS is the Nation's first federally administered, continuous survey on time use in the United States.

It measures, for example, time spent with children, working, sleeping, or doing leisure activities. In the United States, several existing Federal surveys collect income and wage data for individuals and families, and analysts often use such measures of material prosperity as proxies for quality of life. Time-use data substantially augment these quality-of-life measures. The data also can be used in conjunction with wage data to evaluate the contribution of non-market work to national economies. This enables comparisons of production between nations that have different mixes of market and non-market activities.

The ATUS develops nationally representative estimates of how people spend their time. Respondents also report who was with them during activities, where they were, how long each activity lasted, and if they were paid. All of this information has numerous practical applications for sociologists, economists, educators, government policymakers, businesspersons, health researchers, and others, potentially answering the following questions:

- Do the ways people use their time vary across demographic and labor force characteristics, such as age, sex, race, ethnicity, employment status, earnings, and education?
- How much time do parents spend in the company of their children, either actively providing care or being with them while socializing, relaxing, or doing other things?
- How are earnings related to leisure time—do those with higher earnings spend more or less time relaxing and socializing?
- Where do people work—at a workplace, in their homes, or someplace else?
- How does the way people use their time affect their health, safety, and well-being?

The ATUS data are collected on an ongoing, monthly basis, so time series data will eventually become available, allowing analysts to identify changes in how people spend their time.

II. Current Action

Office of Management and Budget clearance is being sought for the ATUS. This survey collects information on how individuals in the United States use their time. Collection is done on a continuous basis with the sample drawn monthly. The survey sample is drawn from households completing their final month of interviews for the Current Population Survey (CPS). Households are selected to ensure a representative demographic sample, and one

individual from each household is selected to take part in one Computer Assisted Telephone Interview. In this interview, respondents are asked to report all of their activities for one pre-assigned 24-hour day, which is the day prior to the interview. A short series of summary questions and CPS updates follow the core time diary collection. After each full year of collection, annual national estimates of time use for an average weekday or weekend day are available.

Beginning in January 2010, well-being questions sponsored by the National Institute on Aging are proposed to be added to the ATUS. These questions will be included in the survey for 12 months (through December 2010). These questions will ask respondents to rate on a 0-to-6 scale how happy, tired, stressed, sad, and in pain they felt during randomly selected activities. Respondents will not be asked these questions about personal activities. Additional questions will be asked about general health, use of pain medications, and interactions with others.

The data from this module will provide a richer description of work. Specifically, the results will measure how workers feel during work episodes compared to nonwork episodes, and how often and with whom workers interact on the job. The results also can be used to measure whether the amount of pain varies by occupation and disability status. These data will also allow for research into how pain and aging affect time usage.

Because the ATUS sample is a subset of households completing interviews for the CPS, the same demographic information collected from that survey is available for ATUS respondents. Comparisons of activity patterns across characteristics such as sex, race, age, disability status, and education of the respondent, as well as the presence of children and the number of adults living in the respondent's household, are possible.

III. Desired Focus of Comments

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

- Enhance the quality, utility, and clarity of the information to be collected.

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

Type of Review: Revision of a currently approved collection.

Agency: Bureau of Labor Statistics.

Title: American Time Use Survey.

OMB Number: 1220-0175.

Affected Public: Individuals or households.

Total Respondents: 13,240.

Frequency: Monthly.

Total Responses: 13,240.

Average Time per Response: 19.75 minutes.

Estimated Total Burden Hours: 4,358 hours.

Total Burden Cost (capital/startup): \$0.

Total Burden Cost (operating/maintenance): \$0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they also will become a matter of public record.

Signed at Washington, DC, this 24th day of March 2009.

Cathy Kazanowski,

*Chief, Division of Management Systems,
Bureau of Labor Statistics.*

Data Users Advisory Committee; Notice of Meeting and Agenda

The first meeting of the Data Users Advisory Committee will be held Thursday, April 23, 2009. The meeting will be held in the Postal Square Building, 2 Massachusetts Avenue, NE., Washington, DC.

The Data Users Advisory Committee is a technical committee composed of data users from various sectors of the U.S. economy, including labor, business, research, academic and government communities. Committee members are called upon to provide advice on technical matters related to the collection, tabulation, and analysis of the Bureau's statistics, on its published reports, and on the broader
