n. The existing West Branch Project includes two developments (Sysladobsis and West Grand) comprising two dams and a dike. The 23,500 acre impounded waters are comprised of West Grand, Junior, Pocumcus, Pug, Bottle, Norway, and Scraggly lakes.

The Sysladobsis development includes the 250-foot-long by 9-foot-high Sysladobsis Dam (the furthest upstream), an earth embankment structure with a timber gate and fish facility. The dam impounds the 5,400-acres Sysladobsis Lake and discharges directly into the West Grand development.

The approximately 487-foot-long West Grand Dam comprises a 105.9-foot-long gate structure with five gates. A vertical slot design upstream fish passage facility is located adjacent to the dam's waste gate No.1.

The approximately 535-foot-long by 15-foot-high Farm Cove Dike is located approximately 3.5 miles west of the main outlet dam to West Grand Lake. The dike comprises a 10-foot-wide by 30-foot-long fishway. The dike has no gates or other flow controls; the only flow passing capability is through the fishway.

No new construction is planned.

Comments, terms and conditions, recommendations, prescriptions, and reply comments, if any, will be addressed in an EA.
