

listed in § 301.86–2 from an infested field within the last 10 years; or, within the last 10 years, the field shared ownership, tenancy, seed, drainage or runoff, farm machinery, or other elements of shared cultural practices with an infested field that could allow spread of the PCN, as determined by the Administrator.

Paragraph (b) describes the conditions for the designation of an area less than an entire State as a quarantined area. Less than an entire State will be designated as a quarantined area only if the Administrator determines that:

- The State has adopted and is enforcing restrictions on the intrastate movement of the regulated articles that are equivalent to those imposed by the regulations on the interstate movement of regulated articles; and
- The designation of less than the entire State as a quarantined area will prevent the interstate spread of PCN.

We have determined that it is not necessary to designate the entire State of Idaho as a quarantined area. Idaho has adopted and is enforcing restrictions on the intrastate movement of regulated articles from that area that are equivalent to those we are imposing on the interstate movement of regulated articles.

Paragraph (d) provides for the removal of fields from quarantine. An infested field will be removed from quarantine when a 3-year biosurvey protocol approved by APHIS has been completed and the field has been found to be free of PCN. An associated field will be removed from quarantine when the field has been found to be free of PCN according to a survey protocol approved by the Administrator as sufficient to support removal from quarantine. Any area other than infested or associated fields which has been quarantined by the Administrator because of its inseparability for quarantine enforcement purposes from infested or associated fields will be removed from quarantine when the relevant infested or associated fields are removed from quarantine.

Paragraph (a) of § 301.86–3 further provides that the Administrator will publish the description of the quarantined area on the Plant Protection and Quarantine (PPQ) Web site, http://www.aphis.usda.gov/plant_health/plant_pest_info/potato/pcn.shtml. The description of the quarantined area will include the date the description was last updated and a description of the changes that have been made to the quarantined area. The description of the quarantined area may also be obtained by request from any local office of PPQ; local offices are listed in telephone

directories. Finally, paragraph (a) establishes that, after a change is made to the quarantined area, we will publish a notice in the **Federal Register** informing the public that the change has occurred and describing the change to the quarantined area.

We are publishing this notice to inform the public of changes to the PCN quarantined area in accordance with § 301.86–3(a). On December 9, 2008, we updated the quarantined area to remove 20 fields (1,183 acres in total) from the quarantined area. On January 14, 2009, we updated the quarantined area to remove an additional 17 fields (2,146 acres in total) from the quarantined area. These actions removed a total of 3,329 acres from quarantine.

The fields were removed from quarantine as associated fields after being found to be free of PCN according to a survey protocol approved by the Administrator as sufficient to support removal from quarantine, under paragraph (d)(2) of § 301.86–3. The fields removed from quarantine were in Bingham, Bonneville, and Jefferson Counties.

The current map of the quarantined area can be viewed on the PPQ Web site at http://www.aphis.usda.gov/plant_health/plant_pest_info/potato/pcn.shtml.

DEPARTMENT OF COMMERCE

**Submission for OMB Review;
 Comment Request**

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of Industry and Security (BIS).

Title: Firearms Convention.

OMB Control Number: 0694-0114.

Form Number(s): N/A.

Type of Request: Regular submission.

Burden Hours: 485.

Number of Respondents: 970.

Average Hours per Response: 30 minutes.

Needs and Uses: The twenty-nine members of the Organization of American States (OAS), including the United States, signed the Inter-American Convention Against the Illicit Manufacturing of and Trafficking in Firearms Ammunition, Explosives, and Other Related Materials (Firearms Convention) in 1997. The existing body of federal laws in the United States, including the Export Administration Act of 1979 (EAA), is adequate to satisfy the Convention's provisions regarding requirements for legislation.

This collection is required by Sections 742.17 and 748.14 of the Export Administration Regulations (EAR), which are authorized by Section 15(b) of the EAA. There are currently two information collection requirements necessary to implement the Firearms Convention: (1) U.S. exporters to acquire an Import Certificate to support requests for licenses authorizing the export of firearms and related equipment to participating OAS countries; and (2) a licensing requirement for Firearms Convention items destined to Canada, a Convention Signatory. A license was not previously required for the export of such items to Canada. It is now necessary for exporters to Canada to obtain a license.

Affected Public: Businesses and other for-profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain benefits.

OMB Desk Officer: Jasmeet Sehra, (202) 395-3123.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau plans to continue the current OMB clearance for the Survey of Plant Capacity Utilization (SPC). The SPC is conducted quarterly, collecting from manufacturing plants and publishers, the value of actual production and the value of production that could have been achieved if operating at "full production" levels. The survey also collects data on work patterns by shift. These data include hours in operation, production workers, and plant hours worked.

The primary user of these data will be the Federal Reserve Board (FRB) and
