

reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air, in varying quantities." Under section 109 of the CAA, EPA establishes NAAQS for each listed pollutant, with the NAAQS based on the air quality criteria. Section 109(d) of the CAA requires periodic review and, if appropriate, revision of existing air quality criteria. The revised air quality criteria reflect advances in scientific knowledge on the effects of the pollutant on public health or welfare. The EPA is also required to periodically review and revise the NAAQS, if appropriate, based on the revised criteria.

Air quality criteria have been established for CO to provide protection from exposure to ambient concentrations of CO. Presently, EPA is reviewing the air quality criteria and NAAQS for CO. The EPA's overall plan and schedule for this review is presented in the *Integrated Review Plan for the National Ambient Air Quality Standards for Carbon Monoxide*.¹ A draft of the integrated review plan was released for public review and comment in March 2008 and was the subject of a publicly accessible teleconference consultation with the CASAC on April 8, 2008 (73 FR 12998). Comments received from that consultation and from the public were considered in finalizing the plan and in beginning the review of the air quality criteria.

As part of the review of the air quality criteria for CO, EPA's Office of Research and Development (ORD) has completed a draft document, *Integrated Science Assessment (ISA) for Carbon Monoxide* (First External Review Draft, March, 2009) and requested review by the CASAC and the public (74 FR 10734; March 12, 2009). In the future, EPA's OAQPS will prepare a Risk and Exposure Assessment (REA) focusing on human exposure, and possibly, risk assessment. The planning document announced today describes the planned approaches for conducting the quantitative assessments that will be presented in the REA as part of the review of the primary (health-based) standards. This planning document is available on the Agency's Technology Transfer Network (TTN) Web site at http://www.epa.gov/ttn/naaqs/standards/co/s_co_cr_pd.html. This document may be accessed in the "Documents from Current Review"

section under "Planning Documents." This planning document is intended to provide enough specificity to facilitate consultation with CASAC, as well as for public review, in order to obtain advice on the overall scope, approaches and key issues in advance of conducting quantitative analyses and presentation of results in the first draft REA. The CASAC consultation on this planning document coincides with its review of the first draft ISA. This CASAC meeting is scheduled for May 12 and 13, 2009. A separate **Federal Register** notice (74 FR 15265; April 3, 2009) provides additional details about this meeting and the process for participation.
