

EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify Federal and State agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all Federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties.

However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

Motions to intervene, protests and comments may be filed electronically via the Internet in lieu of paper; see, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link. The Commission strongly encourages electronic filings.

Comment Date: April 30, 2009.

Kimberly D. Bose,

Secretary.

[Project No. 13352-000]

Olsen Electric Development Co., Inc.; Notice of Preliminary Permit Applications Accepted for Filing and Soliciting Comment, Motions To Intervene, and Competing Applications

April 9, 2009.

On January 20, 2009, Olsen Electric Development Co., Inc. filed an application, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Malden Mills Hydroelectric Project, to be located on the Spicket River, in Essex County, Massachusetts.

The proposed Malden Mills Hydroelectric Project consists of: (1) An existing 85-foot-long, 12-foot-high wooden flashboards; (2) an existing 10-acre head pond having a maximum storage capacity of about 36 acre-feet; (3) a refurbished gatehouse containing two turbine generating units with a total installed capacity of 0.2 megawatts; (4) a direct connection to an existing substation; and (5) appurtenant facilities. The Malden Mills Project would have an average annual generation of 850 megawatt-hours, which would be sold to Polartec, LLC.

Applicant Contact: Mr. Jerome A. Olson, Olsen Electric Development Co., Inc., 30r Hampshire Street, Methuen, MA 01844, phone (978) 975-0400.

FERC Contact: John Ramer, (202) 502-8969.

Deadline for filing comments, motions to intervene, competing applications

(without notices of intent), or notices of intent to file competing applications: 60 days from the issuance of this notice. Comments, motions to intervene, notices of intent, and competing applications may be filed electronically via the Internet. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link. If unable to be filed electronically, documents may be paper-filed. To paper-file, an original and eight copies should be mailed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. For more information on how to submit these types of filings please go to the Commission's Web site located at <http://www.ferc.gov/filing-comments.asp>. More information about this project can be viewed or printed on the "eLibrary" link of Commission's Web site at <http://www.ferc.gov/docs-filing/elibrary.asp>. Enter the docket number (P-13352) in the docket number field to access the document. For assistance, call toll-free 1-866-208-3372.

Kimberly D. Bose,

Secretary.

Hydro Energy Technologies, LLC; Notice of Preliminary Permit Applications Accepted for Filing and Soliciting Comment, Motions To Intervene, and Competing Applications

April 9, 2009.

On December 9, 2008, Hydro Energy Technologies, LLC filed an application, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Mosquito Creek Hydroelectric Project, to be located on Mosquito Creek, in Trumbull County, Ohio.

The proposed Mosquito Creek Hydroelectric Project would be located at: (1) the existing U.S. Army Corps of Engineers 5,650-foot-long, 47-foot-high Mosquito Creek Dam; and (2) an existing 8,900-acre reservoir with water surface elevation of 904 feet mean sea level.

The proposed project would consist of: (1) A new powerhouse containing one or more turbine/generators with a total installed capacity of 0.5 megawatts; (2) a new 50-foot-long, 60-inch-diameter penstock; (3) a new 400-foot-long
