Title: NESHAP for Paper and Other Web Coating (Renewal).

ICR Numbers: EPA ICR Number 1951.04, OMB Control Number 2060-0511.

ICR Status: This ICR is scheduled to expire on June 30, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Paper and Other Web Coating were proposed on September 13, 2000 (65 FR 55331), and promulgated on December 4, 2002 (67 FR 72341). These standards apply to each existing, new, or reconstructed paper and other Web coating (POWC) plant.

Owners or operators of the affected facilities must make the following notification: (1) Initial notification; (2) notification of performance test; and (3) notification of compliance status. Affected sources must submit performance test reports, and a startup, shutdown, malfunction (SSM) report. Owners or operators are also required to maintain records on a monthly basis. They are: (1) Continuous emission monitor data; (2) control device and capture system operating parameter data; (3) organic HAP content data; (4) volatile matter and coating solids content data; (5) overall control efficiency determination using capture efficiency and control device; (6) material usage, organic HAP usage, volatile matter usage, and coating solids usage; and (7) liquid-liquid material balances. Semiannual compliance reports are also required.

Any owner or operator subject to the provisions of this subpart must maintain a file of these measurements, and retain the file for at least five years following the collection of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA regulations listed in 40 CFR part 9 and 48 CFR chapter 15, are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 23 hours per response. Burden means the total time,

effort, or financial resources expended by persons to generate, maintain, retain, or disclose and provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Paper and other Web coating manufacturers.

Estimated Number of Respondents: 215.

Frequency of Response: Initially, monthly, semiannually, and occasionally.

Estimated Total Annual Hour Burden: 11,312.

Estimated Total Annual Cost: \$1,765,629, which is comprised of \$913,229 in Labor costs, \$233,500 in capital/startup costs and O&M costs of \$618,900.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the current growth rate for the industry is very low, negative or nonexistent, so there is no significant change in the overall burden. It should be noted that there is a correction to labor cost. We also rounded-up the cost figures to the nearest dollar.

Dated: April 13, 2009.

John Moses,

Acting Director, Collection Strategies Division.
