Clomazone and Fomesafen Registration Review Draft Ecological Risk Assessments; Notice of Availability

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of EPA's draft ecological risk assessments for the registration review of both clomazone and fomesafen and opens a public comment period on these documents. At the same time, EPA is initiating consultation for clomazone and fomesafen with the U.S. Fish and Wildlife Service and the National Marine Fisheries Service regarding potential effects to species listed as endangered or threatened under the Endangered Species Act. Registration review is EPA's periodic review of pesticide registrations to ensure that each pesticide continues to satisfy the statutory standard for registration, that is, the pesticide can perform its intended function without unreasonable adverse effects on human health or the environment. As part of the registration review process, the Agency has completed comprehensive draft ecological risk assessments, including endangered species effects determinations, for all clomazone and fomesafen uses. After reviewing comments received during the public comment period, EPA will issue final risk assessments, explain any changes from the draft risk assessments, and respond to comments. Once the ecological risk assessments have been finalized, the Agency will issue its proposed registration review decisions for these pesticides and seek public comment on any proposed risk mitigation. Through this program, EPA is ensuring that each pesticide's registration is based on current scientific and other knowledge, including its effects on human health and the environment.
