SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft regulatory guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide (DG), entitled, "Performance-Based Containment Leak-Test Program," is temporarily identified by its task number, DG-1220, which should be mentioned in all related correspondence. DG-1220 is proposed Revision 1 of Regulatory Guide 1.163.

DG-1220 provides guidance on a performance-based leak-test program, leakage-rate test methods, procedures, and analyses that the NRC considers acceptable for use in complying with the Option B, performance-based requirements, in Appendix J, "Primary Reactor Containment Leakage Testing for Water-Cooled Power Reactors," to Title 10, Part 50, "Domestic Licensing of Production and Utilization Facilities," of the Code of Federal Regulations (10 CFR Part 50). Licensees may voluntarily choose either Option A, "Prescriptive Requirements," or Option B to meet the requirements of Appendix J to 10 CFR Part 50.

II. Further Information

The NRC staff is soliciting comments on DG-1220. Comments may be accompanied by relevant information or supporting data and should mention DG-1220 in the subject line. Comments submitted in writing or in electronic

Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (the Commission or NRC) is considering an application for approval of a transfer of control regarding Special Nuclear Material License Nos. SNM-7003 and SNM-2011. These licenses were issued on February 24, 2004, and April 13, 2007, respectively, to USEC Inc., (the Licensee), for its American Centrifuge Lead Cascade Facility (LCF) and American Centrifuge Plant (ACP), both located at the Portsmouth Gaseous Diffusion Plant site in Piketon, Ohio. The licenses authorize the Licensee to:

- (1) possess and use source and special nuclear material at the LCF; and,
- (2) construct and operate a gas centrifuge uranium enrichment facility, the ACP.

The application now being considered is dated February 10, 2009. The Licensee proposes to modify its existing corporate structure and has established a subsidiary limited liability corporation, American Centrifuge Holdings, LLC. American Centrifuge Holding, LLC consists of three additional subsidiaries: American Centrifuge Technology, LLC, American Centrifuge Enrichment, LLC, and

American Centrifuge Operating, LLC. The Licensee requests NRC consent to transfer control of License Nos. SNM-7003 and SNM-2011 from USEC Inc. to the subsidiary limited liability company, American Centrifuge Operating, LLC. In addition, the Licensee requests NRC approval of changes to the LCF and the ACP Material Licenses, License Applications, and Security Program documents to reflect the changes in the Licensee's corporate structure. No physical or operational changes to the LCF or the ACP are being proposed. An NRC administrative review, documented in an e-mail sent to the Licensee on March 27, 2009, (ADAMS accession number ML090860886), found the application acceptable to begin a more detailed technical review. If the application is granted, the license would be amended for administrative purposes to reflect the transfer, by replacing references in the license to USEC Inc., with references to American Centrifuge Operating, LLC.

Pursuant to Title 10 of the Code of Federal Regulations (10 CFR), Section 2.1301, the Commission is noticing in the **Federal Register** the receipt of the application for approval of the transfer of SNM-7003 and SNM-2001 because they involve major fuel cycle facilities licensed under 10 CFR part 70. The NRC is considering the issuance of an order in accordance with 10 CFR 70.36, authorizing the transfer of control from USEC, Inc. to American Centrifuge Operating, LLC. Pursuant to 10 CFR 70.36, no license granted under 10 CFR part 70, and no right thereunder to possess or utilize special nuclear material granted by any license issued pursuant to the regulations in this part, shall be transferred, assigned, or in any manner disposed of, either voluntary or involuntary, directly or indirectly, through transfer of control of any license to any person unless the Commission shall, after securing full information, find that the transfer is in accordance with the provisions of the Atomic Energy Act (AEA), and gives its consent in writing. The Commission will approve an application for the transfer of a license, if the Commission determines that the proposed restructuring and reorganization will not affect the qualifications of the Licensee to hold the license, and that the transfer is otherwise consistent with applicable provisions of law, regulations, and orders issued by the Commission pursuant thereto.

If the February 10, 2009, application is granted, the licenses would be amended to reflect the Licensee's new status as an LLC and USEC Inc.'s reorganized ownership. Before such a
