

determining satisfaction levels for existing services. These voluntary customer surveys will be used to ascertain customer satisfaction with the Department of Energy in terms of services and products. Respondents will be individuals and organizations that are the recipients of the Department's services and products. Previous customer surveys have provided useful information to the Department for assessing how well the Department is delivering its services and products and for making improvements. The results are used internally and summaries are provided to the Office of Management and Budget on an annual basis, and are used to satisfy the requirements and the spirit of Executive Order No. 12862.

II. Current Actions

The request to OMB will be for a three-year extension of the expiration date of approval for the Form DOE-887 "DOE Customer Surveys." Examples of previously conducted customer surveys are available upon request. Planned activities in the next three years reflect an increased emphasis on and expansion of these activities, including an increased use of Web-based and electronic means for obtaining customer input.

III. Request for Comments

Prospective respondents and other interested parties should comment on the actions discussed in item II. The following guidelines are provided to assist in the preparation of comments.

As a Potential Respondent to the Request for Information:

A. Is the proposed collection of information necessary for the proper performance of the functions of the agency and does the information have practical utility?

B. What actions could be taken to help ensure and maximize the quality, objectivity, utility, and integrity of the information to be collected?

C. Are the instructions and definitions clear and sufficient? If not, which instructions need clarification?

D. Can the information be submitted by the respondent by the due date?

E. Public reporting burden for this collection is estimated to average .25 hours per response. The estimated burden includes the total time necessary to provide the requested information. In your opinion, how accurate is this estimate?

F. The agency estimates that the only cost to a respondent is for the time it will take to complete the collection. Will a respondent incur any start-up costs for reporting, or any recurring annual costs for operation, maintenance,

and purchase of services associated with the information collection?

G. What additional actions could be taken to minimize the burden of this collection of information? Such actions may involve the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

H. Does any other Federal, State, or local agency collect similar information? If so, specify the agency, the data element(s), and the methods of collection.

As a Potential User of the Information to be Collected:

A. Is the proposed collection of information necessary for the proper performance of the functions of the agency and does the information have practical utility?

B. What actions could be taken to help ensure and maximize the quality, objectivity, utility, and integrity of the information disseminated?

C. Is the information useful at the levels of detail to be collected?

D. For what purpose(s) would the information be used? Be specific.

E. Are there alternate sources for the information and are they useful? If so, what are their weaknesses and/or strengths?

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of the form. They also will become a matter of public record.

Statutory Authority: Executive Order 12,862 § 1, 58 FR 48,257 (Sept. 11, 1993).

Issued in Washington, DC, April 23, 2009.

Stanley R. Freedman,

Acting Director, Statistics and Methods Group, Energy Information Administration.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC09-567-001]

Commission Information Collection Activities (FERC-567); Comment Request; Submitted for OMB Review

April 22, 2009.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice.

SUMMARY: In compliance with the requirements of section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 3507, the Federal Energy Regulatory Commission (Commission or

FERC) has submitted the information collection described below to the Office of Management and Budget (OMB) for review of the information collection requirements. Any interested person may file comments directly with OMB and should address a copy of those comments to the Commission as explained below. The Commission received no comments in response to the **Federal Register** notice (73 FR 74163, 12/5/2008) and has made this notation in its submission to OMB.

DATES: Comments on the collection of information are due by May 28, 2009.

ADDRESSES: Address comments on the collection of information to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Federal Energy Regulatory Commission Desk Officer. Comments to OMB should be filed electronically, c/o *oira_submission@omb.eop.gov* and include OMB Control No. 1902-0005 as a point of reference. The OMB Desk Officer may be reached by telephone at 202-395-4638.

A copy of the comments should also be sent to the Federal Energy Regulatory Commission and should refer to Docket No. IC09-567-001. Comments may be filed either electronically or in paper format. Those persons filing electronically do not need to make a paper filing. Documents filed electronically via the Internet must be prepared in an acceptable filing format and in compliance with the FERC submission guidelines. Complete filing instructions and acceptable filing formats are available at <http://www.ferc.gov/help/submission-guide/electronic-media.asp>. To file the document electronically, access the Commission's Web site and click on Documents & Filing, E-Filing (<http://www.ferc.gov/docs-filing/efiling.asp>), and then follow the instructions for each screen. First time users will have to establish a user name and password. The Commission will send an automatic acknowledgement to the sender's e-mail address upon receipt of comments.

For paper filings, an original and 2 copies of the comments should be submitted to the Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street, NE., Washington, DC 20426, and should refer to Docket No. IC09-567-001.

All comments may be viewed, printed or downloaded remotely via the Internet through FERC's homepage using the "eLibrary" link. For user assistance, contact fercolinesupport@ferc.gov or toll-free at (866) 208-3676 or for TTY, contact (202) 502-8659.

FOR FURTHER INFORMATION CONTACT:

Ellen Brown may be reached by telephone at (202) 502-8663, by fax at (202) 273-0873, and by e-mail at *ellen.brown@ferc.gov*.

SUPPLEMENTARY INFORMATION: The FERC is requesting comments on the FERC-567,¹ Gas Pipeline Certificates: Annual Reports of System Flow Diagrams. FERC-567 is an existing data collection (OMB Control No. 1902-0005) consisting of a set of filing requirements, as contained in 18 CFR 260.8.

The information from the FERC-567 is used by the Commission staff to obtain accurate data on pipeline facilities and to validate the need for new facilities proposed by pipelines in certificate applications. In modeling a pipeline applicant's system, Commission staff utilizes the FERC-567

data to determine configuration and location of installed pipeline facilities; verify and determine the receipt and delivery points between shippers, producers and pipeline companies; determine the location of receipt and delivery points and emergency interconnections on a pipeline system; determine the location of pipeline segments, laterals and compressor stations on a pipeline system; verify pipeline segment lengths and pipeline diameters; justify the maximum allowable operating pressures and suction and discharge pressures at compressor stations; verify the installed horsepower and volumes compressed at each compressor station; determine the existing shippers and producers currently using each pipeline company; and develop and evaluate alternatives to

the proposed facilities as a means to mitigate environmental impact of new pipeline construction.

18 CFR 260.8 requires each major natural gas pipeline with a system delivery capacity exceeding 100,000 Mcf per day to file, to submit by June 1 of each year, diagrams reflecting operating conditions on the pipeline's main transmission system during the previous 12 months ended December 31. These data are physical/engineering data which are not included as part of any other data collection requirement.

Action: The Commission is requesting a three-year extension of the current expiration date, with no change to the existing requirements.¹

Burden Statement: Annual reporting burden for this collection is estimated as:

FERC data collection	Number of respondents annually	Number of responses per respondent	Average burden hours per response	Total annual burden hours ²
	(1)	(2)	(3)	(1) × (2) × (3)
FERC-567	94 ³	1.714	81.28	13,095.5

The estimated annual cost burden² to respondents is \$807,747 (13,095.5 hours/2080 hours per year times \$128,297 per year average per employee = \$807,747). The estimated cost per respondent is \$8,593.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to

providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization, rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology,

e.g. permitting electronic submission of responses.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Energy Information Administration (EIA), Department of Energy (DOE).

ACTION: Agency information collection activities: proposed collection; comment request.

SUMMARY: The EIA is soliciting comments on the proposed revisions and a three-year extension to the Forms: EIA-851A, "Domestic Uranium Production Report (Annual)," EIA-851Q, "Domestic Uranium Production Report (Quarterly)," and EIA-858, "Uranium Marketing Annual Survey."

¹ FERC-567 was formerly known as "Gas Pipeline Certificates: Annual Reports of System Flow Diagrams and System Capacity". The capacity reporting requirements under 18 CFR 284.13 had been inadvertently included under both the FERC-567 and the FERC-549B ("Gas Pipeline Rates: Capacity Information"; OMB Control No. 1902-0169). To correct the inadvertent 'double-counting',

the capacity reporting requirements under 18 CFR 284.13 are removed from FERC-567, and remain a part of FERC-549B for the purpose of OMB clearance. FERC-549B is not a subject of this Notice.

² The burden and cost figures may not be exact, due to rounding. For these calculations, the number

of hours an employee works each year is 2,080, and the average annual salary per employee is estimated to be \$128,297.

³ An estimate of 100 respondents was included in the 60-day notice. That estimate has been updated here, based on the number of filings submitted in 2008.
