Why are you publishing this notice?

We are publishing this notice to notify you that we propose to adjust our irrigation assessment rate. This notice is published in accordance with the BIA's regulations governing its operation and maintenance of irrigation projects, found at 25 CFR Part 171. This regulation provides for the establishment and publication of the 2011 rate for annual irrigation assessments as well as related information about the SCIP–JW.

What authorizes you to issue this notice?

Our authority to issue this notice is vested in the Secretary of the Interior by 5 U.S.C. 301 and the Act of August 14, 1914 (38 Stat. 583; 25 U.S.C. 385). The Secretary has in turn delegated this authority to the Assistant Secretary—Indian Affairs under Part 209, Chapter 8.1A, of the Department of the Interior's Departmental Manual.

When will you put the rate adjustments into effect?

We will put the rate adjustment into effect for the 2011 irrigation season and subsequent years where applicable.

How do you calculate irrigation rates?

We calculate annual irrigation assessment rates in accordance with 25 CFR Part 171.500 by estimating the annual costs of operation and maintenance at each of our irrigation projects and then dividing by the total assessable acres for that particular irrigation project. The result of this calculation for the SCIP–JW is stated in the rate table in this notice.

What kinds of expenses do you consider in determining the estimated annual costs of operation and maintenance?

Consistent with 25 CFR Part 171.500, these expenses include the following:

- (a) Salary and benefits for the project engineer/manager and project employees under the project engineer/manager's management or control;
- (b) Materials and supplies;
- (c) Vehicle and equipment repairs;
- (d) Equipment costs, including lease fees;
- (e) Depreciation;
- (f) Acquisition costs;
- (g) Maintenance of a reserve fund available for contingencies or emergency costs needed for the reliable operation of the irrigation facility infrastructure;
- (h) Maintenance of a vehicle and heavy equipment replacement fund;
- (i) Systematic rehabilitation and replacement of project facilities;
- (j) Contingencies for unknown costs and omitted budget items; and
- (k) Other expenses we determine necessary to properly perform the activities and functions characteristic of an irrigation project.

When should I pay my irrigation assessment?

We will mail or hand-deliver your bill notifying you of: (a) The amount you owe to the United States, and (b) when such amount is due. If we mail your bill, we will consider it as being delivered no later than 5 business days after the day we mail it. You should pay your bill by the due date stated on the bill.

What information must I provide for billing purposes?

All responsible parties are required to provide the following information to the billing office associated with the SCIP–JW:

- (1) The full legal name of person or entity responsible for paying the bill;
- (2) An adequate and correct address for mailing or hand delivering our bill; and
- (3) The taxpayer identification number or social security number of the person or entity responsible for paying the bill.

Why are you collecting my taxpayer identification number or social security number?

Public Law 104–134, the Debt Collection Improvement Act of 1996, requires that we collect the taxpayer identification number or social security number before billing a responsible party and as a condition to servicing the account.

What happens if I am a responsible party but I fail to furnish the information required to the billing office responsible for the SCIP–JW?

If you are late paying your bill because of your failure to furnish the required information listed above, you will be assessed interest and penalties as provided below, and your failure to provide the required information will not provide grounds for you to appeal your bill or any penalties assessed.

What can happen if I do not provide the information required for billing purposes?

We can refuse to provide you irrigation service.

If I allow my bill to become past due, could this affect my water delivery?

If we do not receive your payment before the close of business on the 30th day after the due date stated on your bill, we will send you a past due notice. This past due notice will have additional information concerning your rights. We will consider your past due notice as delivered no later than 5 business days after the day we mail it.

We have the right to refuse water delivery to any irrigated land for which the bill is past due. We can continue to refuse water delivery until you pay your bill or make payment arrangements to which we agree. We follow the procedures provided in 31 CFR 901.2, "Demand for Payment," when demanding payment of your past due bill.

Are there any additional charges if I am late paying my bill?

Yes. We will assess you interest on the amount owed, using the rate of interest established annually by the Secretary of the United States Treasury (Treasury) to calculate what you will be assessed (31 CFR 901.9(b)). You will not be assessed this charge until your bill is past due. However, if you allow your bill to become past due, interest will accrue from the original due date, not the past due date. Also, you will be charged an administrative fee of \$12.50 for each time we try to collect your past due bill. If your bill becomes more than 90 days past due, you will be assessed a penalty charge of six percent (6%) per year, which will accrue from the date your bill initially became past due. As a Federal agency, we are required to charge interest, penalties, and administrative costs on debts owed to us pursuant to 31 U.S.C. 3717 and 31 CFR 901.9, "Interest, penalties, and administrative costs."

What else will happen to my past due bill?

If you do not pay your bill or make payment arrangements to which we agree, we are required to send your past due bill to the Treasury for further action. Under the provisions of 31 CFR 901.1, "Aggressive agency collection activity," we must send any unpaid annual irrigation assessment bill to Treasury no later than 180 days after the original due date of the bill.
