SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its

Abstract: The U.S. Department of Education has commissioned Westat to independently evaluate the PDP program. This evaluation is divided into two studies, one focusing on the National Centers, the other on the Institutes of Higher Education (IHEs). The Study of the National Centers will examine the materials and services that have been developed and provided by the Centers as well as characteristics of the consumers. In addition, the panel of experts will rate the quality of a sample of products and services from each Center along three dimensions: adherence to scientifically based standards, relevance to the field, and usefulness. The IHE Study will collect data through a survey of proposed Project Directors of funded and non-funded projects, as well as a collection of materials documenting improvement of funded courses of study. It will address (a) status; (b) focus; (c) entry and completion requirements; (d) grant support for students; (e) changes to the course of study since the time of the application; (f) enrollment and completion information; (g) standardized exit exam scores; (h)

allocation of PDP grant funds; and (i) information about formal data collection from program.

Direct requests for additional information or copies of the information collection instrument and instructions to Mr. James Raba, U.S. Department of Energy, Building Technologies Program (EE-2J), 950 L'Enfant Plaza, Washington, DC 20024-2123, (202) 586-8654, jim.raba@ee.doe.gov. Telephone: (202) 586-9507. E-mail: Francine.Pinto@hq.doe.gov or Michael.Kido@hq.doe.gov.

Authority and Background: EPCA establishes energy efficiency standards and test procedures for certain commercial and industrial equipment, including electric motors, 42 U.S.C. 6291 *et seq.*, and states in relevant part that, "the Secretary [of Energy] shall require manufacturers to certify" that each electric motor meets the applicable efficiency standards. (42 U.S.C. 6316(c)) To achieve this end, EPCA authorizes the Secretary to issue the necessary rules requiring each manufacturer or private labeler of covered electric motors to submit information and reports to ensure compliance. (42 U.S.C. 6316(a)) This directive is carried out under 10 CFR 431.36, Compliance Certification, which requires a

manufacturer or private labeler to submit a compliance statement, as well as a certification report that provides energy efficiency information for each basic model of electric motor that it distributes in commerce in the United States.

In view of the above, the information to be collected is the same as the Compliance Certification information, at appendix C to subpart B of 10 CFR part 431, which provides a format for a manufacturer or private labeler to report the energy efficiency of its basic models of electric motors according to rated horsepower or kilowatts, number of poles (speed in revolutions per minute), and open or enclosed construction. Further, it provides a means for a manufacturer or private labeler to certify compliance with the applicable energy efficiency standards prescribed under section 342(b)(1) of EPCA, codified at 42 U.S.C. 6313(b)(1), through an independent testing or certification program nationally recognized in the United States (section 345(c) of the EPCA, codified at 42 U.S.C. 6316(c)). The information contained in the Compliance Certification is a basis for the energy efficiency information marked on the permanent nameplate of an electric motor and thereby enables purchasers to compare the energy efficiencies of similar motors. 10 CFR 431.31 Compliance Certification information facilitates voluntary compliance with and enforcement of the energy efficiency standards established for electric motors under EPCA 342(b)(1), 42 U.S.C. 6313(b)(1).

SUPPLEMENTARY INFORMATION: (1) *OMB No.:* 1910-NEW. (2) *Collection Title:* Title 10 Code of Federal Regulations Part 431—Energy Efficiency Program for Certain Commercial and Industrial Equipment: Subpart B—Electric Motors: 10 CFR 431.36, Compliance Certification, and Appendix C to Subpart B of Part 431—Compliance Certification, "Certification of Compliance with Energy Efficiency Standards for Electric Motors." (3) *Type of Review:* Reinstatement, without change, of a previously approved collection for which approval has expired. (4) *Purpose:* The purpose of the collection is two-fold: (1) To require the manufacturer or private labeler of certain commercial or industrial electric motors subject to energy efficiency standards prescribed under section 342(b) of EPCA to establish, maintain, and retain records of its test data and subsequent verification of any alternative efficiency determination method used under 10 CFR part 431, *et seq.*; and (2) to preclude distribution in

commerce of any basic model of commercial or industrial electric motor that is subject to an energy efficiency standard set forth under subpart B of part 431, unless the manufacturer or private labeler of that motor has submitted a Compliance Certification to DOE according to the provisions under 10 CFR 431.36, certifying that the basic model meets the requirements of the applicable standard. This information ensures compliance with the energy efficiency standards for certain commercial and industrial electric motors. (5) *Estimated Number of Respondents:* There are approximately 100 manufacturers and private labelers that distribute in commerce in the United States electric motors covered under 10 CFR part 431, *et seq.* (6) *Estimated Total Burden Hours:* There are approximately 300 total recordkeeping and reporting hours (3 hours per manufacturer or private labeler) at a total annualized cost of approximately \$20,000.00 (\$200.00 per manufacturer or private labeler). (7) *Number of Collections:* The request contains one information and recordkeeping requirement for each manufacturer or private labeler.

Comments are invited on (a) whether the information collections are necessary for the proper performance of the functions of DOE, including whether the information has practical utility; (b) the accuracy of DOE's estimate of the burden of the information collections, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collections on respondents, including through the use of automated collection techniques or other forms of information technology, such as permitting the electronic submission of responses.

Comments submitted in response to this notice will be summarized and included in the request for OMB review and approval of these information collections. The comments will also become a matter of public record.

Docket: For direct access to the docket to read background documents or comments received, go to the U.S. Department of Energy, 950 L'Enfant Plaza (Resource Room of the Building Technologies Program, Sixth Floor), Washington, DC, between 9 a.m. and 4 p.m., Monday through Friday, except Federal holidays. Please call Ms. Brenda Edwards-Jones at (202) 586-2945 for additional information regarding the Resource Room.

Statutory Authority: 10 CFR part 431.

Issued in Washington, DC on April 21, 2009.

[Project No. 13373-000]

Hydrodynamics, Inc.; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

April 23, 2009.

On February 12, 2009, Hydrodynamics, Inc. filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Cooney Reservoir Hydroelectric Project, which would be located at the existing Cooney Reservoir dam on Red Lodge Creek near the town of Boyd in Carbon County, Montana. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following:

(1) An existing 2,369-foot-long, 103-foot-high earthen dam; (2) an existing reservoir with a surface area of 1,078 acres and a storage capacity of 28,230 acre-feet at the normal water surface elevation of 4,173 feet mean sea level; (3) an existing 430-foot-long concrete dam outlet works tunnel, which would be lined with steel; (4) a new 54-inch-diameter, 430-foot-long penstock in the tunnel; (5) a new 20-foot-long penstock extending from the tunnel to the
