

permitting authorities. Section 505(b)(2) of the Act authorizes any person to petition the EPA Administrator, within 60 days after the expiration of this review period, to object to a Title V operating permit if EPA has not done so. Petitions must be based only on objections to the permit that were raised with reasonable specificity during the public comment period provided by the State, unless the petitioner demonstrates that it was impracticable to raise these issues during the comment period or the grounds for the issues arose after this period.

On March 21, 2008, EPA received a petition from Rocky Mountain Clean Air Action requesting that EPA object to the issuance of the Title V operating permit to CEMEX, Inc. for the operation of the Lyons Cement Plant. First, the Petitioner alleges that the CEMEX, Inc. Lyons Cement Plant modified the Plant without including emission limits and standards that represent Best Achievable Control Technology (BACT)

and Lowest Achievable Emission Rate (LAER) consistent with the Prevention of Significant Deterioration (PSD) and the Nonattainment New Source Review (NA NSR) provisions. In addition, the Petitioner alleges that the Title V permit fails to include a compliance plan to bring the plant into compliance with emission limits that represent BACT and LAER. The Petitioner alleges a compliance plan is necessary and cites to the Notice of Violation (NOV) EPA issued to CEMEX on March 28, 2007. EPA issued the NOV to CEMEX alleging violations, in part, of regulations for PSD and NA NSR. Second, the Petitioner raises several allegations of PSD and NSR violations in addition to those alleged in the EPA NOV. Specifically, Petitioner alleged that there were six kiln modifications and three dryer modifications that violated PSD and NA NSR requirements.

On April 20, 2009, the Administrator issued an order partially granting and partially denying the petition. The order

explains the reasons behind EPA's conclusion to partially grant and partially deny the petition for objection.
