

collecting claims, and managing other claim activity.

*Need and Use of the Information:* The Food and Nutrition Service (FNS) will collect information on the outstanding aggregate claim balance; claims established; collections; any balance and collection adjustments; and the amount to be retained for collecting non-agency error claims. The information will be used by State agencies to ascertain aggregate claim balance and collections for determining overall performance, the collection amounts to return to FNS, and claim retention amounts. FNS will receive collections and report collection activity to Treasury. If this data is collected less often than quarterly, it would delay the Federal collection of the Federal share of the State agency's collections. FNS would not be able to effectively monitor the collection and recovery of program funds or protect the integrity of the program.

*Description of Respondents:* State, Local or Tribal Government.

*Number of Respondents:* 53.

*Frequency of Responses:* Reporting: Quarterly.
