

on August 28, 2008 (73 FR 50834). The draft CCP/EA evaluated 3 alternatives for managing the 12 Refuges for the next 15 years.

The preferred alternative will provide for enhanced wetland and upland management, where warranted, on Refuge lands. Management objectives for various habitat types are based on habitat preferences of groups of target species, such as waterfowl, migratory shore birds, grassland bird species, and priority species. Refuge staff will focus on high-priority tracts and medium-priority tracts. The Refuge staff will implement compatible production enhancement techniques for targeted migratory bird populations. The Refuge staff will maintain existing environmental education and public use programs, with additional waterfowl emphasis. We propose, at a future date, a new environmental learning center for Audubon Refuge, and we are also planning interpretive panels for Lake Alice Refuge.

We selected the preferred alternative because it best meets the purposes and goals of the Refuge, as well as the mission and goals of the National Wildlife Refuge System. The preferred alternative will benefit migrating and nesting waterfowl, shore birds, migratory upland birds, and resident wildlife. Environmental education and partnerships will result in improved wildlife-dependent recreational opportunities. Cultural and historical resources as well as federally listed species will be protected.

We are furnishing this notice to advise other agencies and the public of the availability of the final CCP and Finding of No Significant Impact, to provide information on desired conditions for the Refuges, and to detail how we will implement management strategies. Based on the review and evaluation of the information contained in the environmental assessment, our Regional Director has determined that implementation of the final CCP does not constitute a major Federal action that would significantly affect the quality of the human environment within the meaning of Section 102(2)(c) of the National Environmental Policy Act. Therefore, an Environmental Impact Statement will not be prepared. Future site-specific proposals discussed in the final CCP will be addressed in separate planning efforts with full public involvement.

Dated: March 10, 2009.

Noreen E Walsh,

Deputy Regional Director.
