

adversely affect the Oregon chub's habitat within a specified distance during the term of their Cooperative Agreement.

Without the regulatory assurances provided through the Agreement and permit, landowners may otherwise be unwilling or reluctant to engage in activities that would place federally listed species such as the Oregon chub onto their properties. The proposed Agreement is expected to provide a net conservation benefit to the Oregon chub by creating new refugia populations through translocations or by enhancing the quality, quantity or connectivity of floodplain habitat for naturally occurring populations, thereby increasing the distribution, abundance and genetic diversity of the species.

The Service has made a preliminary determination that the proposed Agreement and permit application are eligible for a categorical exclusion under the National Environmental Policy Act of 1969 (NEPA). We explain the basis for this determination in an Environmental Action Statement that is also available for public review (see ADDRESSES).

Public Availability of Comments

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

The Service will evaluate the permit application, associated documents, and comments submitted thereon to determine whether the permit application meets the requirements of section 10(a)(1)(A) of the Act and NEPA regulations. If we determine that all requirements are met, we will sign the Agreement and issue an enhancement of survival permit under section 10(a)(1)(A) of the Act to ODFW for the take of Oregon chub, incidental to otherwise lawful activities in accordance with the terms of the Agreement. This notice is provided pursuant to section 10(c) of the Act and NEPA regulations (40 CFR 1506.6).
