

change the operating processes of the existing facility. The proposed action will not adversely affect Federal or State-listed threatened or endangered species nor flora and fauna in the site vicinity.

Airborne effluents released through stacks and liquid effluents released in the North Cape Fear River are below and are anticipated to remain below regulatory limits in 10 CFR Part 20 for non-radiological and radiological contaminants. Public and occupational exposures are below the limit established in 10 CFR Part 20. GNF-A maintains acceptable waste management practices and procedures. The staff concluded that the proposed 40 year renewal of license SNM-1097 will not result in a significant impact to the environment.

NRC staff consulted with other agencies regarding the proposed action, including the National Oceanic and Atmospheric Administration (NOAA)

Fisheries, the North Carolina State Historic Preservation Office, The Waccamaw Siouan Tribe, the North Carolina Cape Fear Regional Council of Governments, the North Carolina Department of Environment and Natural Resources, the North Carolina Department of Agriculture, the North Carolina Department of Cultural Resources, the North Carolina Department of Transportation, the North Carolina Crime Control & Public Safety, Division of Emergency Management, Floodplain Management Program, New Hanover County Planning, and New Hanover County Environmental. The consultations ensured that the requirements of Section 7 of the Endangered Species Act and Section 106 of the National Historic Preservation Act were met and provided the designated State liaison agency the opportunity to comment on the proposed action.

III. Finding of No Significant Impact

On the basis of the EA, NRC has concluded that there are no significant environmental impacts from the proposed license renewal and has determined not to prepare an Environmental Impact Statement.
