PJM Interconnection L.L.C.; Notice of Filings

May 19, 2009.

On March 26, 2009, the Commission issued an order accepting new tariff provisions relating to PJM Interconnection, L.L.C. (PJM's) Reliability Pricing Model (RPM) capacity market, including changes to the procedures governing Incremental Auctions that became effective March 27, 2009.¹ One such revision was to the table of default Avoidable Cost Rate (ACR) values for the Base Residual Auction and three subsequent Incremental Auctions that PJM administers for each Delivery Year. Capacity suppliers who fail the market power test may use these ACR values as default bids when they offer capacity into the Incremental Auctions.

On April 29, 2009, the PJM Market Monitor filed a letter to the Commission stating that, due to an oversight on its part, it believes the ACR values contained in those provisions are higher than appropriate for the upcoming Incremental Auctions in June 2009 and January 2010. The Market Monitor is concerned that use of these ACR values may lead to non-competitive market outcomes in the first Incremental Auction (June 1-5, 2009) for Delivery
