I. Funding Opportunity

Drinking water systems are basic and vital to both health and economic development. Hurricanes Katrina, Rita, Ike and Wilma severely damaged water systems in the States of Florida, Alabama, Mississippi, Louisiana, and Texas. Without dependable water supply, rural communities in these states will not attract families and businesses to return and invest in the hurricane damaged communities.

The Rural Utilities Service (RUS) supports the sound development of rural communities and the growth of our economy without endangering the environment. RUS provides financial and technical assistance to help communities bring safe drinking water and sanitary, environmentally sound waste disposal facilities to rural Americans in greatest need. The additional funding for Water Resource Studies will allow rural communities to better plan and secure dependable water supplies for rebuilding their

community's health and economic development. Qualified private non-profit organizations may apply to receive a grant to conduct water resource studies to evaluate sources of dependable water supplies for communities in the hurricane affected states.
