DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[OMB Control No. 9000-0080]

Federal Acquisition Regulation; Information Collection; Integrity of Unit Prices

Agencies: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of reinstatement request for an information collection requirement regarding an existing OMB clearance.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation, Regulatory Secretariat (VPR) will be submitting to the Office of Management and Budget (OMB) a request to reinstate a previously approved information collection requirement concerning Integrity of Unit Prices.

Public comments are particularly invited on: Whether this collection of information is necessary; whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

DATES: Submit comments on or before July 27, 2009.

ADDRESSES: Submit comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: General Services Administration, Regulatory Secretariat (VPR), 1800 F Street NW., Room 4041, Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Mr. Edward Chambers, Procurement

Analyst, Contract Policy Division, GSA, (202) 501-3221.

SUPPLEMENTARY INFORMATION:

A. Purpose

FAR 15.408(f) and the clause at FAR 52.215-14, Integrity of Unit Prices, require offerors and contractors under Federal contracts that are to be awarded without adequate price competition to identify in their proposals those supplies which they will not manufacture or to which they will not contribute significant value. The policies included in the FAR are required by section 501 of Public Law 98-577 (for the civilian agencies) and section 927 of Public Law 99-500 (for DOD and NASA). The rule contains no reporting requirements on contracts with commercial items.

B. Annual Reporting Burden

Respondents: 1,000.

Responses per Respondent: 10.

Annual Responses: 10,000.

Hours per Response: 1 hour.

Total Burden Hours: 10,000.

Obtaining Copies of Proposals:

Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat (VPR), Room 4041, Washington, DC, 20405, telephone (202) 501-4755. Please cite OMB Control No. 9000-0080, Integrity of Unit Prices.

Dated: May 21, 2009.

Edward Loeb,

Acting Director, Office of Acquisition Policy.

[FR Doc. E9-12364 Filed 5-27-09; 8:45 am]

BILLING CODE 6820-EP-P

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement for a Feasibility Study of the Trilby Wash Study Area

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: Analyses of foreseeable environmental impacts from potential actions in the vicinity of Trilby Wash and the McMicken Dam project area located near the Cities of Surprise, Sun City, El Mirage Litchfield Park and Goodyear, Maricopa County, Arizona will commence. No explicit plans have been advanced as yet, so contents of the Draft Environmental Impact Statement (DEIS) remain to be determined during

the public scoping process. The Trilby Wash Study area encompasses the Trilby Wash watershed upstream and downstream from the McMicken Dam Project which includes: McMicken Dam, McMicken Dam Outlet Channel and McMicken Dam Outlet Wash, approximately 9 miles, 6 miles, and 4 miles respectively in length. The McMicken Dam Outlet Wash discharges to the Agua Fria River in Maricopa County, Central Arizona.

The purposes of this Feasibility Study are to develop and evaluate potential non-structural and engineered solutions to address flooding issues within the study area, to investigate opportunities for ecosystem restoration, and to provide recreational opportunities concurrent with flood risk management and ecosystem restoration. If there are measures and alternatives or plans that could be implemented within the U.S. Army Corps of Engineers, (USACE) missions, the Flood Control District of Maricopa County (FCDMC) has indicated their interest to support and provide necessary cost-sharing and other requirements for the project. The USACE and FCDMC will cooperate in conducting this Feasibility Study.

ADDRESSES: District Engineer, U.S. Army Corps of Engineers, Los Angeles District, ATTN: CESPL-PD-RP, P.O. Box 532711, Los Angeles, CA 90053-2325.

FOR FURTHER INFORMATION CONTACT: Mr. Michael J. Fink, Environmental Manager, telephone (602) 640-2001, ext. 232, or Ms. Gwen Meyer, Project Manager, telephone (602) 640-2004, ext. 281. The cooperating entity, Flood Control District of Maricopa County, requests inquiries be directed to Mr. Sam Sherman, P.E., telephone (602) 506-3639 for any additional information.

SUPPLEMENTARY INFORMATION: 1.

Authorization. This study has been conducted under the authority provided by the Flood Control Act of 1938. This authority directs the Secretary of the Army, through the Chief of Engineers, to conduct preliminary examinations and surveys for flood control on the Gila River and tributaries in Arizona. Further authority is provided under House Committee on Public Works Resolution (Docket 2425) May 17, 1994 which states:

“* * * The Secretary of Army is hereby requested to review reports of the Chief of Engineers on the State of Arizona * * * in the interest of flood damage reduction, environmental protection and restoration, and related purposes.”

2. Background. The study area encompasses Trilby Wash watershed upstream from McMicken Dam, McMicken Dam itself, (approximately 10 miles in length) the Outlet Channel and Outlet Wash to the Agua Fria River, (an additional 10 miles). Originally termed the Trilby Wash Detention Basin Dam, McMicken Dam was constructed by the United States Army Corps of Engineers (USACE) in 1954 and 1955 to protect Luke Air Force Base, the Litchfield Park Naval Air Facility and agriculture activities in the area from flooding. Since its initial construction, new communities, such as Sun City Grand and Arizona Traditions and the Cities of Glendale, Peoria and Surprise have developed downstream from the dam. These communities have been afforded significant flood protection by McMicken Dam as a flood control structure. The dam is operated and maintained by the FCDMC. The dam also provides flood protection for critical public facilities and infrastructure such as; hospitals, schools, police and fire stations, freeways and other public roadways, railroads and canals. The ability of the dam and associated channels to maintain the current level of flood protection for the benefit of the public in an increasingly urbanized environment is in question due to concerns regarding aging infrastructure, land subsidence, earth fissuring, urbanization encroachment, changed hydrologic conditions, and current dam safety standards.

The FCDMC has completed numerous studies and has ongoing projects associated with flood risk management within the study area. This includes but is not limited to Area Drainage Master Plans, alternatives analysis of measures to rehabilitate McMicken Dam, and remediation of fissure risks. The Corps of Engineers and FCDMC entered into a cost share agreement to complete a feasibility study in September 2004. This feasibility study will utilize and expand existing information and work products completed by FCDMC and evaluate Federal participation in addressing issues identified within the study area.

The potential environmental impacts to be evaluated by this DEIS will include: (1) Non-structural solutions to address flooding issues; (2) engineered solutions to address flooding issues; (3) opportunities for ecosystem restoration, and; (4) designs for recreational features which would be most compatible with the natural resources of the region.

3. Proposed Action. No plan of action has yet been identified.
