

The Department will publish in the **Federal Register** a notice of "Initiation of Administrative Review of Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation" for requests received by the last day of June 2009. If the Department does not receive, by the last day of June 2009, a request for review of entries covered by an order, finding, or suspended investigation listed in this notice and for the period identified above, the Department will instruct the U.S. Customs and Border Protection to assess antidumping or countervailing duties on those entries at a rate equal to the cash deposit of (or bond for) estimated antidumping or countervailing duties required on those entries at the time of entry, or withdrawal from warehouse, for consumption and to continue to collect the cash deposit previously ordered.

This notice is not required by statute but is published as a service to the international trading community.

Dated: May 26, 2009.

John M. Andersen,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

International Trade Administration

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Advance Notification of Sunset Reviews

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of upcoming Sunset Reviews.

Background

Every five years, pursuant to section 751(c) of the Tariff Act of 1930, as amended ("the Act"), the Department of Commerce ("the Department") and the International Trade Commission automatically initiate and conduct a review to determine whether revocation of a countervailing or antidumping duty order or termination of an investigation suspended under section 704 or 734 of the Act would be likely to lead to continuation or recurrence of dumping or a countervailable subsidy (as the case may be) and of material injury.

Upcoming Sunset Reviews for July 2009

The following Sunset Reviews are scheduled for initiation in July 2009 and will appear in that month's Notice of Initiation of Five-Year Sunset Reviews.

Antidumping duty proceedings	Department contact
Barium Chloride from the PRC (A-570-007) (3rd Review)	Matthew Renkey, (202) 482-2312.
Chloropicrin from the PRC (A-570-002) (3rd Review)	Matthew Renkey, (202) 482-2312.
Floor-Standing, Metal-Top Ironing Tables and Parts Thereof from the PRC (A-570-888)	Brandon Farlander, (202) 482-0182.
Polyethylene Retail Carrier Bags from the PRC (A-570-886)	Dana Mermelstein, (202) 482-1391.
Polyethylene Retail Carrier Bags from Malaysia (A-557-813)	Dana Mermelstein, (202) 482-1391.
Polyethylene Retail Carrier Bags from Thailand (A-549-821)	Dana Mermelstein, (202) 482-1391.
Sorbitol from France (A-427-001) (3rd Review)	Dana Mermelstein, (202) 482-1391.
Stainless Steel Wire Rod from Italy (A-475-820) (2nd Review)	Brandon Farlander, (202) 482-0182.
Stainless Steel Wire Rod from Japan (A-588-843) (2nd Review)	Brandon Farlander, (202) 482-0182.
Stainless Steel Wire Rod from South Korea (A-580-829) (2nd Review)	Dana Mermelstein, (202) 482-1391.
Stainless Steel Wire Rod from Spain (A-469-807) (2nd Review)	Brandon Farlander, (202) 482-0182.
Stainless Steel Wire Rod from Taiwan (A-583-828) (2nd Review)	Brandon Farlander, (202) 482-0182.
Tetrahydrofurfuryl Alcohol from the PRC (A-570-887)	Matthew Renkey, (202) 482-2312.

Countervailing Duty Proceedings

No Sunset Reviews of countervailing duty orders are scheduled for initiation in July 2009.

Suspended Investigations

No Sunset Reviews of suspended investigations are scheduled for initiation in July 2009.

The Department's procedures for the conduct of Sunset Reviews are set forth in 19 CFR 351.218. Guidance on methodological or analytical issues relevant to the Department's conduct of Sunset Reviews is set forth in the Department's Policy Bulletin 98.3—*Policies Regarding the Conduct of Five-year ("Sunset") Reviews of Antidumping and Countervailing Duty Orders; Policy Bulletin*, 63 FR 18871 (April 16, 1998). The Notice of Initiation of Five-Year ("Sunset") Reviews provides further information regarding what is required of all parties to participate in Sunset Reviews.

Pursuant to 19 CFR 351.103(c), the Department will maintain and make

available a service list for these proceedings. To facilitate the timely preparation of the service list(s), it is requested that those seeking recognition as interested parties to a proceeding contact the Department in writing within 10 days of the publication of the Notice of Initiation.

Please note that if the Department receives a Notice of Intent To Participate from a member of the domestic industry within 15 days of the date of initiation, the review will continue. Thereafter, any interested party wishing to participate in the Sunset Review must provide substantive comments in response to the notice of initiation no later than 30 days after the date of initiation.

This notice is not required by statute but is published as a service to the international trading community.

Dated: May 26, 2009.

John M. Andersen,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

DEPARTMENT OF COMMERCE

International Trade Administration

[A-570-933]

Notice of Correction to Antidumping Duty Order: Frontseating Service Valves From the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

DATES: Effective Date: June 1, 2009.

FOR FURTHER INFORMATION CONTACT: Eugene Degnan at (202) 482-0414, Import Administration, International Trade Administration, U.S. Department

of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

On March 13, 2009, the Department published the final determination of sales at less than fair value of frontseating service valves (“FSVs”) from the People’s Republic of China (“PRC”). See *Frontseating Service Valves From the People’s Republic of China: Final Determination of Sales at Less Than Fair Value and Final Negative Determination of Critical Circumstances*, 74 FR 10886 (March 13, 2009) (“*Final Determination*”). On April 21, 2009, the International Trade Commission (“ITC”) notified the Department of Commerce (“the Department”) of its final determination pursuant to section 735(d) of the Tariff Act of 1930, as amended (“the Act”), that an industry in the United States is materially injured within the meaning of section 735(b)(1)(A)(i) of the Act by reason of less-than-fair-value imports of FSVs from the PRC. See Letter from the ITC to the Secretary of Commerce, “Notification of Final Affirmative Determination of Frontseating Service Valves from the People’s Republic of China,” Investigation No. 731–TA–1148 (April 21, 2009); see also *Frontseating Service Valves From China; Determination*, 74 FR 19107 (April 27, 2009). On April 28, 2009, pursuant to section 736(a) of the Act, the Department published the antidumping duty order on FSVs from the PRC. See *Antidumping Duty Order: Frontseating Service Valves from the People’s Republic of China*, 74 FR 19196 (April 28, 2009) (“*Order*”).

Scope of the Order

The merchandise covered by this order is frontseating service valves, assembled or unassembled, complete or incomplete, and certain parts thereof. Frontseating service valves contain a sealing surface on the front side of the valve stem that allows the indoor unit or outdoor unit to be isolated from the refrigerant stream when the air conditioning or refrigeration unit is being serviced. Frontseating service valves rely on an elastomer seal when the stem cap is removed for servicing and the stem cap metal to metal seat to create this seal to the atmosphere during normal operation.¹

¹ The frontseating service valve differs from a backseating service valve in that a backseating service valve has two sealing surfaces on the valve stem. This difference typically incorporates a valve stem on a backseating service valve to be machined of steel, where a frontseating service valve has a

For purposes of the scope, the term “unassembled” frontseating service valve means a brazed subassembly requiring any one or more of the following processes: The insertion of a valve core pin, the insertion of a valve stem and/or O ring, the application or installation of a stem cap, charge port cap or tube dust cap. The term “complete” frontseating service valve means a product sold ready for installation into an air conditioning or refrigeration unit. The term “incomplete” frontseating service valve means a product that when sold is in multiple pieces, sections, subassemblies or components and is incapable of being installed into an air conditioning or refrigeration unit as a single, unified valve without further assembly.

The major parts or components of frontseating service valves intended to be covered by the scope under the term “certain parts thereof” are any brazed subassembly consisting of any two or more of the following components: A valve body, field connection tube, factory connection tube or valve charge port. The valve body is a rectangular block, or brass forging, machined to be hollow in the interior, with a generally square shaped seat (bottom of body). The field connection tube and factory connection tube consist of copper or other metallic tubing, cut to length, shaped and brazed to the valve body in order to create two ports, the factory connection tube and the field connection tube, each on opposite sides of the valve assembly body. The valve charge port is a service port via which a hose connection can be used to charge or evacuate the refrigerant medium or to monitor the system pressure for diagnostic purposes.

The scope includes frontseating service valves of any size, configuration, material composition or connection type. Frontseating service valves are classified under subheading 8481.80.1095, and also have been classified under subheading 8415.90.80.85, of the Harmonized Tariff Schedule of the United States (“HTSUS”). It is possible for frontseating service valves to be manufactured out of primary materials other than copper and brass, in which case they would be classified under HTSUS subheadings 8481.80.3040, 8481.80.3090, or 8481.80.5090. In addition, if unassembled or incomplete frontseating service valves are imported, the various parts or components would

brass stem. The backseating service valve dual stem seal (on the back side of the stem), creates a metal to metal seal when the valve is in the open position, thus, sealing the stem from the atmosphere.

be classified under HTSUS subheadings 8481.90.1000, 8481.90.3000, or 8481.90.5000. The HTSUS subheadings are provided for convenience and customs purposes, but the written description of the scope of this proceeding is dispositive.

Correction to Antidumping Duty Order

In the *Order*, the Department stated that in accordance with section 736(a)(1) of the Act, it will direct U.S. Customs and Border Protection (“CBP”) to assess, upon further information from the Department, antidumping duties equal to the amount by which the normal value of the merchandise exceeds the export price (or the constructed export price) of the merchandise for all relevant entries of FSVs from the PRC. We further stated that these antidumping duties will be assessed on all unliquidated entries of FSVs entered, or withdrawn from the warehouse, for consumption on or after October 22, 2008, the date on which the Department published its notice of preliminary determination in the **Federal Register**. See *Frontseating Service Valves from the People’s Republic of China: Preliminary Determination of Sales at Less Than Fair Value, Preliminary Negative Determination of Critical Circumstances, and Postponement of Final Determination*, 73 FR 62952 (October 22, 2008) (“*Preliminary Determination*”).

However, the Department inadvertently neglected to state that section 733(d) of the Act states that instructions issued pursuant to an affirmative preliminary determination may not remain in effect for more than four months except where exporters representing a significant proportion of exports of the subject merchandise request the Department to extend that four-month period to no more than six months. At the request of the exporters that account for a significant proportion of FSVs in the PRC, we extended the four-month period to no more than six months. See Letter from Zhejiang DunAn Precision Industries Co., Ltd., Zhejiang DunAn Hetian Metal Co., Ltd. (“DunAn Hetian”) (October 7, 2008). In the underlying investigation, the six-month period beginning on the date of the publication of the preliminary determination ended on April 20, 2009. Furthermore, section 737(b) of the Act states that definitive duties are to begin on the date of publication of the ITC’s final injury determination.

Publication of the ITC final injury determination took place on April 27, 2009. See *Frontseating Service Valves From China; Determination*, 74 FR

19107 (April 27, 2009). Therefore, in accordance with section 733(d) of the Act and our practice, we will instruct CBP to terminate the suspension of liquidation and to liquidate, without regard to antidumping duties, unliquidated entries of FSVs from the PRC entered, or withdrawn from warehouse, for consumption after April 20, 2009, and through April 26, 2009, the day preceding the date of publication of the ITC's final injury determination in the **Federal Register**. Suspension of liquidation will resume on and after April 27, 2009, the date of publication of the ITC's final injury determination in the **Federal Register**.

Pursuant to section 735(c)(1) of the Act, CBP should continue to require, effective April 27, 2009, a cash deposit equal to the estimated weighted-average dumping margins as listed in the *Order*.

This notice constitutes a correction to the antidumping duty order with respect to FSVs from the PRC. This corrected order is published in accordance with the section 736(a) of the Act and 19 CFR 351.211.

Dated: May 26, 2009.

Ronald K. Lorentzen,

Acting Assistant Secretary for Import Administration.

National Institute of Standards and Technology

[Docket Number: 090306281-9287-01]

Recovery Act Measurement Science and Engineering Research Fellowship Program

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice.

SUMMARY: The National Institute of Standards and Technology (NIST) is establishing a financial assistance program for awardees to develop and implement with NIST a measurement science and engineering fellowship program as part of NIST's activities implementing the American Recovery and Reinvestment Act of 2009 (ARRA, or Recovery Act), Pub. L. 111-5, 123 Stat. 115. The fellowship program is intended to promote training and practical experience in science and engineering, and to advance NIST's mission to promote U.S. innovation and industrial competitiveness by advancing measurement science, standards, and technology in ways that enhance

economic security and improve our quality of life.

DATES: All applications must be received no later than 3 p.m. Eastern Daylight Saving Time on Monday, July 27, 2009. Late applications will not be reviewed or considered.

ADDRESSES: Proposals may be submitted in hard copy or in electronic format. Hard copy proposals may be submitted to Dr. Jason Boehm, National Institute of Standards and Technology, 100 Bureau Drive, Stop 1060, Gaithersburg, MD 20899-1060. Electronic proposals may be uploaded to <http://www.Grants.gov>.

FOR FURTHER INFORMATION CONTACT: For complete information about this program and instructions for applying by paper or electronically, read the Federal Funding Opportunity (FFO) Notice at <http://www.grants.gov>. A paper copy of the FFO may be obtained by calling (301) 975-5718. Technical questions should be addressed to Dr. Jason Boehm at the address listed in the **ADDRESSES** section above, or at Tel: (301) 975-8678; E-mail:

jason.boehm@nist.gov; Fax: (301) 216-0529. Grants Administration questions should be addressed to Grants and Agreements Management Division, National Institute of Standards and Technology, 100 Bureau Drive, Stop 1650, Gaithersburg, MD 20899-1650; Tel: (301) 975-5718; E-mail: grants@nist.gov; Fax: (301) 840-5976. For assistance with using Grants.gov contact support@grants.gov.

SUPPLEMENTARY INFORMATION:

Authority: 15 U.S.C. 272(b) and (c), 15 U.S.C. 278g-1(a),(b), 15 U.S.C. 278(h), Public Law 111-5, 123 Stat. 115.

Catalog of Federal Domestic Assistance Name and Number: Measurement and Engineering Research and Standards—11.609.

Program Description: The primary program objectives of the NIST Recovery Act Measurement Science and Engineering Fellowship Program are:

1. To provide opportunities for scientists and engineers in training to perform research in broad areas of measurement science at NIST through research fellowships called Research Training Fellowships. Research Training Fellowships will be offered to qualified undergraduate students and graduate students at U.S. universities and colleges, and to postdoctoral researchers, in fields of science and engineering that contribute to NIST's measurement science programs.
2. To provide opportunities for practicing scientists and engineers in the public and private sectors to perform research in broad areas of

measurement science at NIST through research fellowships called Senior Research Fellowships. Senior Research Fellowships will be offered to qualified scientists and engineers working at U.S. private firms, U.S. non-profit organizations, U.S. universities and colleges, and other organizations in fields of science and engineering that contribute to NIST's measurement science programs.

NIST intends this financial assistance program to address both types of opportunities listed above through a single cooperative agreement, or through more than one cooperative agreement.

Through the cooperative agreement(s), the program will advance purposes established in Section 3 of the Recovery Act by creating jobs, promoting economic recovery, providing investments needed to increase economic efficiency by spurring technological advances in science, and by making investments in areas of research that will provide long-term economic benefits.

NIST performs a broad range of research, measurements, modeling, and other activities to support its broad measurement science and engineering programs in ten operating units comprising the NIST laboratories. Further details about this program may be found in the Federal Funding Opportunity announcement for this program.

Funding Availability: The funding instrument used in this program will be a cooperative agreement. Proposals will be considered for cooperative agreements with durations between one and three years, subject to the availability of funds, satisfactory progress, and the continuing relevance to the objectives of NIST. The anticipated level of funding is up to \$20,000,000 (\$20 million) total for the fellowships program for up to three years. NIST anticipates making one to five awards. Projects are expected to start by January 2010.

NIST will determine whether to fund one award for the full amount; to divide available funds into multiple awards of any size, and negotiate scopes of work and budgets as appropriate; or not to select any proposal for funding, upon completing the selection process described below.

Cost Share Requirements: None.

Eligibility: This program is open to U.S. institutions of higher education; U.S. hospitals; U.S. non-profit organizations; U.S. commercial organizations; state, local, and Indian tribal governments.
