SUPPLEMENTARY INFORMATION: The Energy Policy and Conservation Act of 1975 (EPCA) (42 U.S.C. 6291 *et seq.*), as amended, directs DOE to establish energy conservation standards for certain commercial and industrial equipment, including commercial heating, air-conditioning, and water-heating equipment. Of particular relevance here, the statute also requires that each time the corresponding industry standard—the American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc. (ASHRAE)/Illuminating Engineering Society of North America (IESNA) Standard 90.1, *Energy Standard for Buildings Except Low-Rise Residential Buildings*—is amended, DOE must assess whether there is a need to update the uniform national energy conservation standards for the same equipment covered under EPCA. ASHRAE officially released an amended version of this industry standard (ASHRAE Standard 90.1-2007) on January 10, 2008, thereby triggering DOE's related obligations under EPCA.

DOE published a NOPR proposing amended energy conservation standards for commercial packaged boilers and water-cooled and evaporatively-cooled commercial package air conditioners and heat pumps with a cooling capacity at or above 240,000 Btu/h and less than 760,000 Btu/h at the efficiency levels specified by ASHRAE Standard 90.1-2007. 74 FR 12000 (March 20, 2009). DOE outlined its review of ASHRAE Standard 90.1-2007 and a determination of scope for the rulemaking in the March 2009 NOPR. In addition, the NOPR discussed the analytical framework used to evaluate ASHRAE equipment, the analytical models and tools that DOE is using to evaluate amended energy conservation standards for this equipment, and the results of the various rulemaking analyses performed by DOE. Finally, in the NOPR, DOE outlined its preliminary conclusions and the proposed standards for these two equipment types.

As noted above, this NODA announces the availability for public comment of an environmental assessment of the proposed energy conservation standards in the March 20, 2009, NOPR. The EA assesses the impacts of the proposed rule pursuant to the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), the regulations of the Council on Environmental Quality (40 CFR parts 1500-1508), and DOE's regulations for

compliance with the National Environmental Policy Act (10 CFR part 1021). This EA includes a concise examination of the impacts of emission reductions likely to result from the proposed standards for commercial packaged boilers and water-cooled and evaporatively-cooled commercial package air conditioners and heat pumps with a cooling capacity at or above 240,000 Btu/h and less than 760,000 Btu/h. The EA has been incorporated as Chapter 8 in the NOPR TSD. In addition, Chapter 9 of the NOPR TSD provides the results of DOE's monetization analysis of these potential emission reductions. These materials are available online at: http://www1.eere.energy.gov/buildings/appliance_standards/commercial/ashrae_products_nopr.html. DOE specifically requests that interested members of the public, Tribes, and States comment on the EA.

Issued in Washington, DC, on May 29, 2009.

Steven G. Chalk,

Principal Deputy Assistant Secretary, Energy Efficiency and Renewable Energy.
