Title: NESHAP for Semiconductor Manufacturing (Renewal).

ICR Numbers: EPA ICR Number 2042.04, OMB Control Number 2060-0519.

ICR Status: This ICR is scheduled to expire on August 31, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Semiconductor Manufacturing were proposed on May 8, 2002, (67 FR 30848), and promulgated on May 22, 2003, (68 FR 87925). These standards apply to each existing, new, or reconstructed affected source for those manufacturing semiconductors. Semiconductor manufacturing process units are used to manufacture p-type and n-type semiconductor and active solid-state devices from a water substrate, including research and development activities integrated into a semiconductor manufacturing process unit.

Owners or operators of the affected facilities would be required to submit one-time only notifications, compliance status report, and initial performance test results. Respondents are required to maintain records of the occurrence and duration of any startup, shutdown, and malfunction (SSM) in the operations of an affected facility, or any period during which the monitoring system is inoperative. Semiannual summary reports are also required.

Any owner or operator subject to the provisions of this subpart must maintain a file of these measurements and retain the file for at least five years following the collection of such measurements, maintenance reports, and records. All reports are sent to the delegated State or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA regulations listed in 40 CFR part 9 and 48 CFR chapter 15 are

identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 18 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose and provide information to or for a Federal agency. This includes the time needed to review instructions, develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Semiconductor manufacturing.

Estimated Number of Respondents: 1.

Frequency of Response: On occasion, initially, and semiannually.

Estimated Total Annual Hour Burden: 37.

Estimated Total Annual Cost: \$3,167: including \$3,117 for Labor costs, \$50 for operation and maintenance (O&M) costs and 0 for capital/startup costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years, and we are not anticipating any changes over the next three years; and (2) the current growth rate for the industry is very low, negative or nonexistent, so there is no significant change in the overall burden. This standard only regulates existing source, therefore, no new respondent will be subject to the regulation over the next three years.

Since there are no changes in the regulatory requirements and there is no significant industry growth, the labor hours and cost figures in the previous ICR we used in this ICR, and there is no change in burden to industry.

Dated: June 4, 2009.

John Moses,

Director, Collection Strategies Division.
