Title: NESHAP for Integrated Iron and Steel Manufacturing (Renewal).

ICR Numbers: EPA ICR Number 2003.04, OMB Control Number 2060-0517.

ICR Status: This ICR is scheduled to expire on August 31, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Integrated Iron and Steel

Manufacturing were proposed on July 13, 2001 (66 FR 36835), and promulgated on May 20, 2003 (68 FR 27645). The proposed amendments were published August 30, 2005 (70 FR 51306). These standards apply to new and existing sinter plants, blast furnaces, and basic oxygen process furnace (BOPF) shops at integrated iron and steel manufacturing facilities that are major sources of hazardous air pollutants (HAPs), or are collocated at major sources. This information is being collected to assure compliance with 40 CFR part 63, subpart FFFFF.

Owners and operators of affected sources are subject to the monitoring, recordkeeping and reporting requirements of 40 CFR part 63, subpart A, the General Provisions, unless specified otherwise in the regulation. This rule requires sources to submit initial notifications, conduct performance tests if source is using an add-on control device, and submit periodic compliance reports. In addition, sources are required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation if using an add-on control device; any period during which the monitoring system is inoperative; parametric monitoring data; system maintenance and calibration; and work practices to demonstrate initial and ongoing compliance with the regulation.

Any owner or operator subject to the provisions of this subpart must maintain a file of these measurements, and retain the file for at least five years following the collection of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA regulations listed in 40 CFR part 9 and 48 CFR chapter 15, are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information are estimated to average 419 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose and provide information to or for a Federal agency. This includes the time needed to review instructions, develop, acquire, install, and utilize technology and systems for the purposes

of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Integrated iron and steel manufacturing.

Estimated Number of Respondents:

18.

Frequency of Response: On occasion, initially and semiannually.

Estimated Total Annual Hour Burden: 18,421.

Estimated Total Annual Cost:

\$1,627,196; which is comprised of \$1,560,196 in Labor costs, \$67,000 in Operation and Maintenance (O&M) costs, and no capital/startup costs.

Changes in the Estimates: There is no change in the labor hours in this ICR as compared to the previous ICR. This is due to two considerations: (1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is very low, negative or nonexistent, so there is no significant change in the overall burden.

Since there are no changes in the regulatory requirements and there is no significant industry growth, the labor hours and cost figures in the previous ICR are used in this ICR, and there is no change in burden to industry.

Dated: June 4, 2009.

Director, Collection Strategies Division.

Amendment to the Allethrins Reregistration Eligibility Decision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of EPA's Revised Reregistration Eligibility Decision (RED) for the allethrins series of pesticides. EPA amended the allethrins RED to include an assessment of a registered use for the allethrins (use in commercial

animal housing automatic misting systems), which was not considered in the original RED.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, farm worker and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of this Document and Other Related Information?

1. *Docket.* EPA has established a docket for this action under docket identification (ID) number EPA-HQ-OPP-2006-0986. Publicly available docket materials are available either in the electronic docket at <http://www.regulations.gov>, or, if only available in hard copy, at the Office of Pesticide Programs (OPP) Regulatory Public Docket in Rm. S-4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305-5805.

2. *Electronic access.* You may access this **Federal Register** document electronically through the EPA Internet under the "**Federal Register**" listings at <http://www.epa.gov/fedrgstr>.

II. Background

A. What Action is the Agency Taking?

Section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) directs EPA to reevaluate existing pesticides to ensure that they meet current scientific and regulatory standards. In the **Federal Register** issue of September 26, 2007 (72 FR 54662)

(FRL-8144-8), EPA issued a RED for the allethrins under section 4(g)(2)(A) of FIFRA. Due to their uses, risk, and other factors, the allethrins were reviewed through the modified 4-Phase public participation process. Subsequent to publication of the RED, the technical registrant (Valent BioSciences Corporation) identified a product (EPA registration number 21165-62) registered for use in commercial animal housing automatic misting systems, a use not addressed in the RED or in the supporting risk assessments. As a result, the Agency updated the allethrins occupational and residential risk assessment to include an evaluation of this product and use pattern, and revised the RED accordingly. All other risk assessments described in the original RED remain the same.

B. What is the Agency's Authority for Taking this Action?

Section 4(g)(2) of FIFRA, as amended, directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," before calling in product specific data on individual end-use products and either reregistering products or taking other "appropriate regulatory action."
