SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-1115.

Title: DTV Consumer Education Initiative; Section 73.674; FCC Form 388.

Form Number: FCC Form 388.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities; not-for-profit institutions; State, local or tribal governments.

Number of Respondents and Responses: 200 respondents; 1,800 responses.

Estimated Time per Response: 0.50 hour-85 hours.

Frequency of Response: On occasion reporting requirement; Quarterly reporting requirement; Third party disclosure requirement.

Obligation to Respond: Required to obtain benefits. The statutory authority for this collection of information is contained in Sections 4(i), 303(r), 335, and 336 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 303(r), 335, and 336.

Total Annual Burden: 10,940 hours.

Total Annual Cost: None.

Confidentiality: No need for confidentiality required with this collection of information.

Privacy Impact Assessment: No impact(s).

Needs and Uses: After the nationwide DTV transition date of June 12, 2009, full-power television broadcast stations must transmit only digital signals, and may no longer transmit analog signals, except for limited analog "nightlight" service. The DTV Delay Act directs the Commission to take any actions "necessary or appropriate to implement the provisions, and carry out the purposes" of the DTV Delay Act, and to do so within 30 days. Congress extended the transition date in order to permit analog service to continue until consumers have had additional time to prepare. But Congress also directed the Commission to provide flexibility for stations wanting to transition prior to the new date. Stations may have made extensive preparations for a February 17 digital transition and some may have difficulty altering their commitments at this time. The Commission's challenge is to provide opportunities for some stations to end analog broadcasting early without sacrificing the goal of giving consumers additional time to prepare.

Therefore, Commission is revising this information collection to eliminate most of the requirements after June 30, 2009; however, broadcasters must continue to comply with the consumer education information collection requirements until they have completed, and are operating, their final, full-authorized post-transition (DTV) facility.

The information collection requirements that will remain in the collection are as follows:

Broadcaster Education and Reporting (47 CFR 73.674)

(a) *On-Air Education.* Broadcasters must provide on-air DTV Transition consumer education information (e.g., via Public Service Announcements (PSAs), information crawls, snipes or tickers) to their viewers. Broadcasters must comply with one of three alternative sets of rules as provided in the Report and Order. Stations must also provide the following additional information: (1) Geographically specific information detailing areas that are covered by the Grade B analog contour but are not predicted to receive digital service; (2) educational information describing areas where analog signal strength is generally sufficient for viewers to rely on an indoor antenna but where it is likely that they will need an outdoor antenna to receive the digital signal; (3) information to consumers about the need to periodically "rescan" when using over-the-air digital reception equipment, particularly through the end of the transition; (4) stations that are changing their broadcast frequency from VHF to UHF (or vice versa), information to consumers about the need for additional or different equipment to avoid loss of service. Stations may include this information to satisfy part of their existing PSA requirements. In addition, if applicable, stations must provide specific notice to analog viewers who are likely to lose over-the-air service from the station due to changes in the geographic coverage area or population served by the station during or after the transition. Broadcasters must continue to provide on air education to their viewers until they complete their transition to digital-only operations and are operating their final, full-authorized post-transition (DTV) facility. In most cases, stations will be operating at full-authorized post-transition (DTV) facilities no later than the June 12, 2009 nationwide transition deadline, but, in some cases, stations will not have completed construction of their final, fully-authorized DTV facility by June 12 and, therefore, must continue to provide on-air DTV Transition consumer education information to their viewers.

(b) *DTV Consumer Education Quarterly Activity Report, FCC Form 388.* Broadcasters must electronically file a report about its DTV Transition consumer education efforts to the Commission on a quarterly basis. Broadcasters must begin filing these quarterly reports no later than April 10, 2008. In addition, if the broadcaster has a public Web site, they must post these reports on that Web site. Broadcasters

must complete these filings every quarter until they complete their transition to digital-only operations and are operating their final, full-authorized post-transition (DTV) facility.

Licensees or permittees of a directional AM station whose modification does not involve a change in operating frequency must file a notification and comply with 47 CFR 73.1615(b). Licensees or permittees of a directional AM station whose modification does involve a change in frequency and determines it is necessary to discontinue operation for a period not more than 30 days must file a notification and comply with 47 CFR 73.1615(d)(2).

The *Third Report and Order (R&O)* in CC Docket No. 94-102 adopted rules applicable to wireless carriers to permit the use of network-based solutions,

handset-based solutions, or hybrid solutions. The rules require changes both to handsets and wireless networks in providing caller location information as part of Enhanced 911 (E911) services. The Commission adopted the *Third R&O* to encourage the deployment of the best location technology for each area being served, promote competition in E911 location technology, and speed implementation of E911. As part of the rules, the *Third R&O* also adopted a requirement that wireless carriers report their plans for implementing Phase II E911 service to the Commission. Specifically, this report must include the technology they plan to use to provide caller location as well as information to enable public safety organizations, equipment manufacturers, local exchange carriers, and the Commission to plan and support Phase II deployment. The Commission required wireless carriers to file these initial reports in 2000. Carriers are required to update these plans within 30 days of the adoption of any change. The reporting requirements are discussed in detail in 47 CFR 20.18(i).

The information submitted to the Commission will provide public service answering points (PSAPs), providers of location technology, investors, manufacturers, local exchange carriers, and the Commission with valuable information necessary for full Phase II E911 service implementation. These reports will provide helpful, if not essential information for coordinating carrier plans with those manufacturers and PSAPs. The reports will also assist the Commission's efforts to monitor Phase II developments and take action, if necessary, to maintain the Phase II implementation schedule.
