[Project No. 13466-000]

City of Gresham, OR; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

June 9, 2009.

On May 15, 2009, the City of Gresham (permittee) filed an application for a three-year preliminary permit under Section 4(f) of the Federal Power Act (FPA)¹ to study the feasibility of the proposed 50-kilowatt (kW) City of Gresham Wastewater Treatment Plant Outfall Hydroelectric Project No. 13466. The project would be located in Multnomah County, Oregon. The existing City of Gresham Wastewater Treatment Plant (plant) and outfall is owned by the permittee. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

Under current operating conditions, treated wastewater (effluent) from the plant is discharged into three parallel outfall pipes. These three pipes combine into a single pipeline before discharging the effluent into the Columbia River. Under the permittee's proposal, effluent in one of the existing three parallel pipes would flow into a powerhouse to generate electricity before returning to the existing pipeline system. The project would consist of: (1) An existing 3,650-foot-long, 4-foot-diameter outfall pipe directing effluent from the plant to the powerhouse and from the powerhouse to the final outfall pipe; (2) a new 12-foot-high, 16-foot-long concrete

powerhouse; (3) a new single turbine/generator unit with an installed capacity of 50 kW; (4) a new 10-foot-long, 10-foot-wide concrete building to house additional controls and equipment; (5) an existing 650-foot-long, 4.5-foot-diameter outfall pipe discharging flows into the Columbia River; (6) a new 100-foot-long, 12.47-kilovolt transmission line extending from the powerhouse to a proposed intertie with a Portland General Electric power line; and (7) appurtenant facilities. The plant and portions of the outfall that are not directly affected by the project are not included as project features. The proposed project would generate about 413 megawatt-hours annually.

Applicant Contact: Michael Nacrelli, Department of Environmental Services, City of Gresham, Oregon, 1333 NW. Eastman Parkway, Gresham, OR 97030; phone: (503) 661-3000.
