(a) 47 CFR part 2 of the Commission's rules requires each Electro-Magnetic Compatibility (EMC) testing facility that performs equipment testing in support of any request for equipment authorization to file a test site description, either with the Commission or with a Commission-approved accrediting body.

(b) The test site description and the supporting information documents that the EMC testing facility complies with

the testing standards used to make the measurements that support any request for equipment authorization.

(c) In addition, the referenced 47 CFR part 15 rules require that equipment manufacturers file information concerning the testing of TV receivers, which tune to UHF channels, to show that the UHF channels provide approximately the same degree of tuning accuracy with approximately the same expenditure of time and effort.

The Commission or the accrediting body, e.g., EMC testing facility, use the information from these test sites and the supporting documentation, which accompany all requests for equipment authorization:

(a) To ensure that the data are valid and that proper testing procedures are used;

(b) To ensure that potential interference to radio communications is controlled; and

(c) To investigate complaints of harmful interference or to verify the manufacturer's compliance with 47 CFR 2.948 and 15.117(g)(2) of the Commission's rules.
