### DEFENSE SECURITY COOPERATION AGENCY 201 12TH STREET SOUTH, STE 203 ARLINGTON, VA 22202-5408

MAY 2 2 2009

The Honorable Nancy Pelosi Speaker of the House of Representatives Washington, DC 20515-6501

Dear Madam Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No.

09-15, concerning the Department of the Army's proposed Letter(s) of Offer and Acceptance to Egypt for defense articles and services estimated to cost \$820 million.

After this letter is delivered to your office, we plan to issue a press statement to notify the public of this proposed sale.

Sincerely,

Beth M. McCormick Acting Director

# Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) **Prospective Purchaser**: Egypt

(ii) Total Estimated Value:

Major Defense Equipment\* \$510 million
Other \$310 million
TOTAL \$820 million

- (iii) Description and Quantity or Quantities of Articles or Services under Consideration for Purchase: 12 AH-64D Block II APACHE Longbow Helicopters, 27 T700-GE-701D Engines, 36 Modernized Targeting Acquisition and Designation Systems/Pilot Night Vision Sensors, 28 M299 HELLFIRE Longbow Missile Launchers, 14 AN/ALQ-144(V)3 Infrared Jammers, and 14 AN/APR-39B(V)2 Radar Signal Detecting Sets. Also included: composite horizontal stabilizers, Integrated Helmet and Display Sight Systems, repair and return, transportation, depot maintenance, spare and repair parts, support equipment, publications and technical documentation, U.S. Government and contractor technical support, and other related elements of program support.
- (iv) Military Department: Army (VBT)
- (v) Prior Related Cases, if any: FMS case ULB-\$414M-10Aug90 FMS case JBC-\$244M-20Mar95 FMS case UTN-\$440M-12Sep00
- (vi) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: none
- (vii) <u>Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold</u>: See Annex attached.
- (viii) Date Report Delivered to Congress: MAY 2 2 2009

<sup>\*</sup> as defined in Section 47(6) of the Arms Export Control Act.

### **POLICY JUSTIFICATION**

## Egypt - AH-64D APACHE Longbow Helicopters

The Government of Egypt has requested a possible sale of 12 AH-64D Block II APACHE Longbow Helicopters, 27 T700-GE-701D Engines, 36 Modernized Targeting Acquisition and Designation Systems/Pilot Night Vision Sensors, 28 M299 HELLFIRE Longbow Missile Launchers, 14 AN/ALQ-144(V)3 Infrared Jammers, and 14 AN/APR-39B(V)2 Radar Signal Detecting Sets. Also included: composite horizontal stabilizers, Integrated Helmet and Display Sight Systems, repair and return, transportation, depot maintenance, spare and repair parts, support equipment, publications and technical documentation, U.S. Government and contractor technical support, and other related elements of program support. The estimated cost is \$820 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country which has been and continues to be an important force for political stability and economic progress in the Middle East. This sale is consistent with these U.S. objectives and with the 1950 Treaty of Mutual Cooperation and Security.

Egypt will use the AH-64D for its national security and protecting its borders. The aircraft will provide the Egyptian military more advanced targeting and engagement capabilities. The proposed sale will provide for the defense of vital installations and will provide close air support for the military ground forces. Egypt will have no difficulty absorbing these helicopters into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractors will be The Boeing Company in Mesa, Arizona, and St. Louis, Missouri, General Electric Company of Lynn, Massachusetts, and Lockheed Martin Missiles and Fire Control in Orlando, Florida. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale requires the assignment of one U.S. Government representative to Egypt for a period of six years to provide intensive coordination, monitoring, and technical assistance to assure a smooth transition of the helicopters in country. Additionally, six contractor representatives will be in Egypt conducting duties as Contractor Field Service Representatives for a period of five years and with a possible five-year extension.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

#### Transmittal No. 09-15

# Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

### Annex Item No. vii

## (vii) Sensitivity of Technology:

- 1. The AH-64D APACHE Attack Helicopter includes the following sensitive and/or classified (up to and including Secret) components:
- a. The Modernized Target Acquisition and Designation Sight/Pilot Night Vision Sensor (MTADS/PNVS) provides day, night, limited adverse weather target information, as well as night navigation capabilities. The PNVS provides thermal imaging that permits nap-of-the-earth flight to, from, and within the battle area, while TADS provides the co-pilot gunner with search, detection, recognition, and designation by means of Direct View Optics (DVO), television, and Forward Looking Infrared (FLIR) sighting systems that may be used singularly or in combinations. Hardware is Unclassified. Technical manuals for authorized maintenance levels are Unclassified. Reverse engineering is not a major concern.
- b. The AN/ALQ-144A(V)3 Infrared Jammer is an active, continuous operating, omni-directional, electrically fired infrared (IR) jammer system designed to confuse or decoy threat IR missile systems, in conjunction with low reflective paint and engine suppressors. Hardware is classified Confidential and releasable technical manuals for operation and maintenance are classified Secret. Reverse engineering and development of counter countermeasures are concerns if the hardware and releasable technical data are compromised to a competent adversary.
- c. The AN/APR-39B Radar Signal Detecting Set is a system, that provides warning of a radar directed air defense threat and includes appropriate countermeasures. This is the 1553 databus compatible configuration. The hardware is classified Confidential when programmed with U.S. threat data; releasable technical manuals for operation and maintenance are classified Confidential; releasable technical data (technical performance) is classified Secret.

- d. The Integrated Helmet Display Sight System (IHDSS) is an enhanced version of its predecessor. It will provide improved operational performance primarily in resolution allowing greater utilization of the M-TADS/M-PNVS performance enhancements. The hardware is Unclassified.
- 2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.
