SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled "Guidance for Industry: Measures to Address the Risk for Contamination by *Salmonella* Species in Food Containing a Pistachio-Derived Product as an Ingredient." This draft guidance is intended to clarify for manufacturers who produce foods containing a pistachio-derived product as an ingredient that there is a risk that *Salmonella* species (spp.) may be present in the incoming pistachio-derived product, and to recommend measures to address that risk. Pistachio-derived products include roasted in-shell pistachios and shelled pistachios (also called kernels) that are roasted or raw.

We are issuing this guidance in light of a recent investigation by FDA and the California Department of Public Health of *Salmonella* spp. contamination in pistachio-derived products (Ref. 1). The producer issued a voluntary recall involving a substantial quantity of its products. Because the recalled pistachio-derived products were used as ingredients in a variety of foods, this recall affected many products and resulted in additional recalls (Ref. 1).

FDA is issuing this draft guidance as level 1 guidance consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance represents the agency's current thinking on measures to address the risk for contamination by *Salmonella* spp. in food containing a pistachio-derived product as an ingredient. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternate approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.
