

sources using multiple methods, including secondary analyses of project-related materials such as existing databases (MSP Management Information System—OMB 3145–0199), annual reports, Web sites, and relevant policy and methodological documents and original data collection through one-on-one interviews with key stakeholders conducted during site visits. For the MSP Management Information System, the contract team will analyze these data using quantitative statistical models. A second data source consists of annual project reports and other reports submitted by the MSP grantees to the NSF in accordance with Federal research project reporting requirements established at NSF under OMB 3145–0058. A third source is U.S. Department of Education's public use files on student achievement and school systems' demographic characteristics.

The fourth source for data is the proposed evaluation's original data collection activities. In particular and principally, a series of site visits will be conducted during 2006–2011.

The evaluation's overall framework consists of several substudies each focusing on a different, but essential part of the MSP grantees' work (e.g., partnerships, the role of disciplinary faculty, student achievement). The relevant evaluation design under these conditions might be considered a meta-analytic rather than singular design—e.g., providing a rationale for the selection of substudies as well as some guidance for conducting the substudies. Consultations have occurred with a team of external experts on the research design during the evaluation's design phase and will continue to take place throughout the evaluation. The team of external experts represents the nation's leading researchers and scholars on methodology and content in the field of evaluation and representatives are from top-tier university schools of education and departments of mathematics or science; an education advocacy group; and an education research council.

The data collection instruments include face-to-face interviews, such as focus groups, and telephone or electronic surveys. An interview protocol based on the evaluation framework will be administered during the site visits. Expected respondents at site visits are Principal Investigators, co-Principal Investigators, administrators, teams of external experts, and other stakeholders who participated in MSP. There are no costs to respondents other than the time involved in the interview or survey process.

Information from the evaluation's data collections and analysis will be used to improve the NSF's program processes and outcomes. It will enable NSF to prepare and publish reports, and to respond to requests from Committees of Visitors, Congress, and the Office of Management and Budget, particularly as related to the Government Performance and Results Act (GPRA) and the Program Effectiveness Rating Tool (PART).

The primary evaluation questions include but are not limited to:

(1) How has the MSP Program effected or influenced the expertise, numbers, and diversity of the mathematics and science teaching force, K–12 student achievement in mathematics and science, and other presumed program outcomes?

(2) What factors or attributes have accelerated or constrained progress in the MSP Program's achievements? and

(3) How have institutions of higher education (IHEs) disciplinary faculty (mathematics, science, and engineering) participated in the MSP Program, and what has been their role in the Program's achievements?

*Respondents:* Individuals and not-for-profit institutions.

*Estimated Number of Total Respondents:* 216.

*Total Burden on the Public:* 456 hours.

Dated: July 1, 2009.

## NATIONAL TRANSPORTATION SAFETY BOARD

### Sunshine Act Meeting

#### Agenda

**TIME AND DATE:** 9:30 a.m., July 14, 2009.

**PLACE:** NTSB Conference Center, 429 L'Enfant Plaza SW., Washington, DC 20594.

**STATUS:** The one item is open to the public.

**MATTER TO BE CONSIDERED:** 8126 Railroad Accident Report—Collision Between Two Massachusetts Bay Transportation Authority Green Line Trains, Newton, Massachusetts, May 28, 2008.

**NEWS MEDIA CONTACT:** Telephone: (202) 314–6100.

The press and public may enter the NTSB Conference Center one hour prior to the meeting for set up and seating.

Individuals requesting specific accommodations should contact Rochelle Hall at (202) 314–6305 by Friday, July 10, 2009.

The public may view the meeting via a live or archived webcast by accessing a link under “News & Events” on the NTSB home page at <http://www.nts.gov>.

**FOR MORE INFORMATION CONTACT:** Candi Bing, (202) 314–6403.

Dated: Thursday, July 2, 2009.

**Candi R. Bing,**

*Alternate Federal Register Liaison Officer.*

[FR Doc. E9–16046 Filed 7–2–09; 4:15 pm]

## NUCLEAR REGULATORY COMMISSION

[NRC–2009–0280]

### Final Regulatory Guide: Issuance, Availability

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of Issuance and Availability of Regulatory Guide, RG 5.74.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC or Commission) is issuing a new guide in the agency's “Regulatory Guide” series. This series was developed to describe and make available to the public information such as methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

**FOR FURTHER INFORMATION CONTACT:** Bonnie Schnetzler, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone: (301) 415–7883 or e-mail to [Bonnie.Schnetzler@nrc.gov](mailto:Bonnie.Schnetzler@nrc.gov).

#### SUPPLEMENTARY INFORMATION:

##### I. Introduction

The U.S. Nuclear Regulatory Commission (NRC or Commission) is issuing a new guide in the agency's “Regulatory Guide” series. This series was developed to describe and make available to the public information such as methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the

staff needs in its review of applications for permits and licenses

RG 5.74, "Managing the Safety/Security Interface," was issued with a temporary identification as Draft Regulatory Guide, DG-5021. This guide describes a method that the staff of the NRC considers acceptable for use in satisfying the requirements of 10 CFR 73.58, "Safety/Security Interface Requirements for Nuclear Power Reactors," of 10 CFR Part 73, "Physical Protection of Plants and Materials." To meet these objectives, NRC licensees shall assess and manage changes to safety and security activities so as to prevent or mitigate potential adverse effects that could negatively impact either plant safety or security.

## II. Further Information

In July 2007, DG-5021 was published for public comment. The staff's responses to the public comments received are located in the NRC's Agencywide Documents Access and Management System under Accession Number ML091690082. Electronic copies of RG 5.74 are available through the NRC's public Web site under "Regulatory Guides" at <http://www.nrc.gov/reading-rm/doc-collections/>.

In addition, regulatory guides are available for inspection at the NRC's Public Document Room (PDR) located at 11555 Rockville Pike, Rockville, Maryland. The PDR's mailing address is USNRC PDR, Washington, DC 20555-0001. The PDR can also be reached by telephone at (301) 415-4737 or (800) 397-4205, by fax at (301) 415-3548, and by e-mail to [pdr.resource@nrc.gov](mailto:pdr.resource@nrc.gov).

Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

Dated at Rockville, Maryland, this 29th day of June, 2009.

For the Nuclear Regulatory Commission.

**R.A. Jervey,**

*Acting Chief, Regulatory Guide Development Branch, Division of Engineering, Office of Nuclear Regulatory Research.*

## NUCLEAR REGULATORY COMMISSION

[NRC-2009-0279]

### Solicitation for Public Comment on Potential Changes to the Agency's Radiation Protection Regulations

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Solicitation of Public Comment.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is seeking public comment on potential changes to the NRC's current radiation protection regulations to achieve greater alignment between the regulations and the 2007 recommendations of the International Commission on Radiological Protection (ICRP) contained in ICRP Publication 103. Stakeholders and the public are encouraged to submit comments concerning potential impacts, burdens, benefits, and concerns electronically to <http://www.regulations.gov>.

### Background

ICRP Publication 103 (December 2007) contains the latest in a series of revised ICRP recommendations for radiation protection. On December 18, 2008, the NRC staff provided a Policy Issue Notation Vote Paper (SECY-08-0197) to the Commission which presented the regulatory options of moving, or not moving, towards a greater degree of alignment of the NRC regulatory framework with ICRP Publication 103. In a Staff Requirements Memorandum (SRM) dated April 2, 2009, the Commission approved the staff's recommendation to begin engagement with stakeholders and interested parties to initiate development of the technical basis for possible revision of the NRC's radiation protection regulations, as appropriate and where scientifically justified, to achieve greater alignment with the recommendations in ICRP Publication 103.

### Discussion

The Commission believes that the current NRC regulatory framework continues to provide adequate protection of health and safety of workers, the public, and the environment. From a safety regulation perspective, ICRP Publication 103 proposes measures that go beyond what the NRC believes are needed to provide adequate protection. In order to ensure that the NRC is well informed of all the benefits and burdens associated with further alignment of NRC's current radiation protection regulations with ICRP Publication 103, the NRC is soliciting input from stakeholders and interested parties on the technical and regulatory issues associated with such changes. The NRC will utilize this feedback in developing the appropriate technical basis for any proposed rulemaking.

An overview of possible changes to both material and reactor-based radiation protection regulations is provided in SECY-08-0197, which is publically available in the Agencywide

Documents Access and Management System (ADAMS) under accession No. ML083360582. The SRM to SECY-08-0197 is also publically available in ADAMS under accession No. ML090920103. In addition, stakeholders and interested parties may introduce other options, issues, and information for the NRC's consideration.

In an effort to facilitate public involvement, the staff will give presentations at a number of radiation protection related conferences and meetings including the Society of Nuclear Medicine Annual Meeting (July 13-17, 2009; Toronto, Canada), Fuel Cycle Information Exchange (June 23-25, 2009), and the Health Physics Society Annual Meeting (July 12-16, 2009); In addition, a Web site dedicated to the potential changes to the NRC's radiation protection regulations is available at <http://www.nrc.gov/about-nrc/regulatory/rulemaking/opt-revise.html>. Please submit any comments or questions by March 31, 2010 to [Reg4rp@nrc.gov](mailto:Reg4rp@nrc.gov).

**FOR FURTHER INFORMATION CONTACT:** Dr. Donald Cool, telephone (301) 415-6347, e-mail, [Donald.Cool@nrc.gov](mailto:Donald.Cool@nrc.gov) or Dr. Kimyata Morgan Butler, telephone (301) 415-0733, e-mail, [Kimyata.MorganButler@nrc.gov](mailto:Kimyata.MorganButler@nrc.gov) of the Office of Federal and State Materials and Environmental Management Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

Dated at Rockville, Maryland, this 25th day of June 2009.

For the Nuclear Regulatory Commission.
