

NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the General Provisions specified at 40 CFR part 63, subpart VVVV.

Owners or operators of the affected facilities must submit a one-time-only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average approximately 230 hours per response.

Respondents/Affected Entities: Boat manufacturers.

Estimated Number of Respondents: 45.

Frequency of Response: Initially, occasionally, semiannually and annually.

Estimated Total Annual Hour Burden: 10,343.

Estimated Total Annual Cost: There are no annualized capital/startup costs or O&M costs associated with this ICR.

EPA will consider any comments received and may amend any of the above ICRs, as appropriate. Then the final ICR packages will be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue one or more **Federal Register** notices pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR(s) to OMB and the opportunity to submit additional comments to OMB. If you have any questions about any of the above ICRs or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: June 26, 2009.

Lisa C. Lund,

Director, Office of Compliance.

EPA Office of Children's Health Protection and Environmental Education Staff Office; Notice of Public Meetings for the National Environmental Education Advisory Council

AGENCY: Environmental Protection Agency.

ACTION: Notice of meetings.

SUMMARY: The U.S. Environmental Protection Agency (EPA or Agency) Office of Children's Health Protection and Environmental Education Office hereby gives notice that the National Environmental Education Advisory Council will hold public meetings by conference call on the 2nd Wednesday of each month, beginning with August 12, 2009 from 12 p.m. to 1 p.m. All times noted are eastern time. The purpose of these meetings is to provide the Council with the opportunity to advise the Environmental Education Division on its implementation of the National Environmental Protection Act of 1990. Requests for the draft agenda will be accepted up to 1 business day before the meeting.

DATES: This notice is applicable for the following dates:

- August 12, 2009.
- September 9, 2009.
- October 14, 2009.
- November 11, 2009.
- December 9, 2009.
- January 13, 2009.

SUPPLEMENTARY INFORMATION:

Participation in the conference calls will be by teleconference only—meeting rooms will not be used. Members of the public may obtain the call-in number and access code for the call from Ginger Potter, the Designated Federal Officer, whose contact information is listed under the **FOR FURTHER INFORMATION CONTACT** section of this notice. Any member of the public interested in receiving a draft meeting agenda may contact Ginger Potter via any of the contact methods listed in the **FOR FURTHER INFORMATION CONTACT** section below.

FOR FURTHER INFORMATION CONTACT: For information regarding this Notice, please contact Ms. Ginger Potter, Designated Federal Officer (DFO), EPA National Environmental Education Advisory Council, at potter.ginger@epa.gov or (202) 564-0453. General information concerning NEEAC can be found on the EPA Web site at: <http://www.epa.gov/enviroed>.

For information on access or services for individuals with disabilities, please contact Ginger Potter as directed above. To request accommodation of a disability, please contact Ginger Potter, preferable at least 10 days prior to the meeting, to give EPA as much time as possible to process your request.

Dated: January 15, 2009.

Ginger Potter,

Designated Federal Officer.

Editorial Note: This document was received in the Office of the Federal Register on July 2, 2009.

National Drinking Water Advisory Council Request for Climate Ready Water Utilities Working Group Nominations

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: The U.S. Environmental Protection Agency (EPA or Agency) is announcing the formation of the Climate Ready Water Utilities Working Group (CRWUWG) of the National Drinking Water Advisory Council, and soliciting all interested persons or organizations to nominate qualified individuals to serve on the working group. For a general description of the working group charge, the criteria for selecting working group members, and the specific directions for submitting working group member nominations, please see the **SUPPLEMENTARY INFORMATION** section.

DATES: Submit nominations via U.S. mail on or before August 7, 2009.

ADDRESSES: Address all nominations to Lauren Wisniewski, National Drinking Water Advisory Council Climate Ready Water Utilities Working Group, U.S. Environmental Protection Agency, Office of Ground Water and Drinking Water, Water Security Division (Mail Code 4608T), 1200 Pennsylvania Avenue, NW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: E-mail your questions to Lauren Wisniewski, wisniewski.lauren@epa.gov, or call 202-564-2918.

SUPPLEMENTARY INFORMATION:

Background: The Agency's *National Water Program Strategy: Response to Climate Change* (2008) identified the need to provide drinking water and

wastewater utilities with easy-to-use resources to assess the risk associated with climate change and to identify potential adaptation strategies. EPA proposes to establish a Climate Ready Water Utilities program that will enable water and wastewater utilities to develop and implement long-range plans that account for climate change impacts. The program recognizes that any comprehensive approach to climate change must include both adaptation and mitigation. It should also engage a broad range of water sector stakeholders. The National Drinking Water Advisory Council (NDWAC), established under the Safe Drinking Water Act, as amended (42 U.S.C. 300f *et seq.*), provides practical and independent advice, consultation and recommendations to the Agency on the activities, functions and policies related to the implementation of the Safe Drinking Water Act. On May 28, 2009, NDWAC voted on and approved the formation of the Climate Ready Water Utilities Working Group. After this working group completes its charge, it will make recommendations to the full NDWAC. The full NDWAC will, in turn, make appropriate recommendations to the EPA.

Working Group Charge: The charge for the Climate Ready Water Utilities Work Group (CRWUWG) is to evaluate the concept of "Climate Ready Water Utilities" and provide recommendations to the full NDWAC on the development of an effective program for drinking water and wastewater utilities, including recommendations to: (1) Define and develop a baseline understanding of how to use available information to develop climate change adaptation and mitigation strategies, including ways to integrate this information into existing complementary programs such as the Effective Utility Management and Climate Ready Estuaries Program; (2) Identify climate change-related tools, training, and products that address short-term and long-term needs of water and wastewater utility managers, decision makers, and engineers, including ways to integrate these tools and training into existing programs; and (3) Incorporate mechanisms to provide recognition or incentives that facilitate broad adoption of climate change adaptation and mitigation strategies by the water sector into existing EPA Office of Water recognition and awards programs or new recognition programs.

Selection Criteria: The EPA is looking to create a diverse CRWUWG. Potential CRWUWG nominations could include individuals from stakeholder organizations such as wastewater and

drinking water utilities, State and local officials, public health officials, environmental organizations, academia, and climate experts. The Agency is looking for a range of utility representation in terms of the size of the population served, geographic location, as well as investor- and publicly-owned and operated facilities. This is not an exhaustive list; it is only intended to provide a framework to consider potential nominees.

Potential nominees should possess the following qualifications: Occupy a senior position within their organization; have broad experience outside their current position; demonstrate experience dealing with public policy issues; have extensive experience with and understanding of water utilities; and be knowledgeable on climate change. CRWUWG members should: Be recognized experts in their fields; be as impartial and objective as possible; collectively represent an array of backgrounds and perspectives within the water sector and related disciplines; and be available to fully participate in the working group.

The schedule remains flexible; however, it is estimated that the first CRWUWG meeting will be convened in the fall of 2009, and subsequent meetings will be conducted over a relatively short time frame, approximately one year. Over the course of this period, CRWUWG members will be asked to attend up to five meetings, participate in conference calls and video-conferencing as necessary, participate in the discussion of key issues at all meetings, and review and finalize the products and outputs of the working group.

Nomination of a Member: Any interested person or organization may nominate qualified individuals for membership to the working group. All nominees should be identified by their name, occupation, position, address, and telephone number. To be considered, all nominations must include a current resume providing the nominee's background, experience and qualifications, in addition to a statement (not to exceed two (2) paragraphs) about their particular expertise and interest in potential climate change impacts on water utilities. Please note that the Agency will not formally acknowledge or respond to nominations. Additional sources may be utilized in the solicitation of nominees.

Dated: June 26, 2009.

Cynthia C. Dougherty,

Director, Office of Ground Water and Drinking Water.

Organic Arsenicals; Notice of Receipt of Requests to Voluntarily Cancel or to Amend to Terminate Uses of Certain Pesticide Registrations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In accordance with section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, EPA is issuing a notice of receipt of requests by the registrants to voluntarily cancel and/or amend their registrations to terminate uses of certain products containing the pesticide organic arsenicals. The organic arsenicals include the pesticides monosodium methanearsonate (MSMA), disodium methanearsonate (DSMA), calcium acid methanearsonate (CAMA), and cacodylic acid and its sodium salt. The requests would terminate the following uses of MSMA: Residential; forestry; non-bearing fruit and nuts; citrus, bearing and non-bearing; bluegrass, fescue and ryegrass grown for seed; drainage ditch banks; railroad, pipeline, and utility rights of way; fence rows; storage yards; and similar non-crop areas. In addition, the requests terminate all uses of MSMA in Florida except for use on cotton grown in Calhoun, Columbia, Escambia, Gadsden, Hamilton, Holmes, Jackson, Jefferson, Okaloosa, Santa Rosa, Suwannee, Walton, and Washington counties. The requests would not terminate the last MSMA products registered for use in the United States. These requests for voluntary cancellation and amendment of MSMA containing products are the result of an agreement in principle signed by the EPA and the technical registrants of the organic arsenicals on January 16 and February 5, 2009. As part of the agreement, the registrants have requested voluntary cancellation of all products containing DSMA, CAMA, and cacodylic acid and its sodium salt. The requests would terminate the last DSMA, CAMA, and cacodylic acid and its sodium salt products registered for use in the United States. EPA intends to grant these requests at the close of the comment period for this announcement
