II. Background

Through a series of transactions, the BLM acquired 736 acres of public land surrounding Blue Creek Bay on Lake Coeur d'Alene over a 10-year period. The acquisition generated considerable public interest and required a substantial investment of public funds. The parcels were acquired with the intent of providing public access to the lake while retaining many of the natural elements in close proximity to a rapidly growing urban/suburban area. The key issues are public health and safety and long-term management of a public access site on Lake Coeur d'Alene.

In developing a recreation plan for this area, BLM conducted extensive public outreach in 2007 and 2008 and analyzed alternative levels of development and different management strategies for the area. The plan considered the physical location and characteristics of the area, the natural resource values, recreational opportunities and public input. The Blue Creek Bay Recreation Project Plan, completed in January 2009, identified a modest level of development that

included day-use only waterfront facilities, such as a parking area, docks, vault toilet and picnic sites, an upland trailhead and non-motorized trails; and interpretive displays for environmental education. The recreation plan also identified supplementary rules necessary for the safety of the adjacent landowners, public land users, and other visitors to the area.

III. Discussion of Proposed Supplementary Rules

The proposed supplementary rules would implement decisions from the Blue Creek Bay Recreation Project Plan, approved January 7, 2009. The rules are necessary to protect natural resources on public land and provide for the public's health and safety. These supplementary rules would replace five existing restrictions orders and include one new restriction on overnight boat moorage.

The following proposed supplementary rules would implement related decisions from the Blue Creek Bay Recreation Project Plan. Additional background information and justification are included following each proposed rule.

(1) You must not occupy or use the Blue Creek Bay public lands from one hour after sundown to one hour before sunrise.

The subject public lands, easily accessible from and in close proximity to a growing urban center, have attracted a variety of nuisance activities involving local youths, day laborers and drug users; that are incompatible with legitimate uses of the area. Unauthorized uses have included underage drinking parties and illegal drug use, illegal campfires, littering, and vandalism. Many of these activities occur when BLM personnel are not available for patrols or public contact. Numerous complaints have been received from local residents regarding nighttime activities and disturbances, particularly at the log landing area.

The emergency overnight occupancy and use restriction, implemented in April 2008, proved effective in reducing these unauthorized uses of the area. The overnight occupancy and use restriction has provided an additional resource protection tool for BLM Law Enforcement Rangers as well as local law enforcement agencies.

(2) You must not moor any boat overnight on any BLM-managed structure or shoreline.

Local residents strongly objected to overnight use of the subject public lands throughout the planning process. The project plan for this area allows for day-use only, including the proposed boat
