

B. Estimated Burden

The Commission staff estimates that about 20 firms are subject to the testing and recordkeeping requirements of the certification regulations. The Commission staff estimates further that the annual testing and recordkeeping burden imposed by the regulations on each of these firms on average is approximately 390 hours if 3 hours are expended by each firm over 130 estimated seasonal production days each year. The estimated annual burden imposed by the testing and recordkeeping requirements on all manufacturers and importers of walk-behind power mowers is 7,800 hours.

In addition, the manufacturer is required to include permanent labels attached to the lawn mowers. The Commission staff estimates an additional hour per production day to collect the information and place it on the label. Accordingly an additional 130 hours per firm is added to the total burden. For the 20 firms, the estimated additional burden related to labeling is 2,600 hours. The estimated total burden hours related to testing recordkeeping and labeling is 520 hours per firm and 10,400 hours for the industry.

Annual testing and recordkeeping costs burden is estimated to be \$428,064 based on 7,800 hours \times 54.88 (the average hourly total compensation for U.S. management, professional, and related occupations in goods-producing industries, Bureau of Labor Statistics, September 2008). Annual costs burden for labeling is estimated to be \$70,564 based on 2,600 hours \times \$27.14 (the average hourly total compensation for sales and office workers in goods-producing industries, Bureau of Labor Statistics, September 2008). The total estimated burden costs related to testing, recordkeeping, and labeling to the industry is \$498,626.

The Commission staff will expend approximately one half of one staff month reviewing records required to be maintained for walk-behind power lawn mowers. The annual cost to the Federal government of the collection of information in these regulations is estimated to be \$6,920.

C. Request for Comments

The Commission solicits written comments from all interested persons about the proposed collection of information. The Commission specifically solicits information relevant to the following topics:

—Whether the collection of information described above is necessary for the proper performance of the Commission's functions, including

whether the information would have practical utility;
 —Whether the estimated burden of the proposed collection of information is accurate;
 —Whether the quality, utility, and clarity of the information to be collected could be enhanced; and
 —Whether the burden imposed by the collection of information could be minimized by use of automated, electronic or other technological collection techniques, or other forms of information technology.
