FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226).

The SWFSC requests a five-year permit to take marine mammals and sea turtles for scientific research purposes in the Pacific, Southern, Indian, and Arctic Oceans. Five species of pinniped, fifty-seven species of cetacean, and five species of sea turtles will be targeted for study. The application consists of three projects. The purposes of Project I (Pinnipeds) are to conduct population assessments for northern elephant seals (*Mirounga angustirostris*), California sea lions (*Zalophus californianus*), Steller sea lions (*Eumetopias jubatus*), and harbor seals (*Phoca vitulina*) via aerial photography, ground or vessel surveys, and photogrammetry to determine abundance, distribution patterns, length frequencies, and breeding densities. Scats and spewings will be collected from California sea lions to determine their diet. This research is part of an ongoing program to assess the status of pinniped species and identify fishery-marine mammal conflicts. The purpose of Project II (Cetaceans) is to determine the abundance, distribution, movement patterns, and stock structure of cetaceans in U.S. territorial and international waters. These studies will be conducted through vessel surveys, aerial surveys, small plane photogrammetry, photo-identification (from vessels and small boats), biological sampling, radio tagging, and satellite tagging. Cetacean abundance data will be used to set limits of allowable human caused mortality under the MMPA and to monitor trends in abundance through time. The purpose of Project III (Sea Turtles) is to determine the abundance, distribution,

movement patterns, stock structure, and diet of sea turtles in U.S. territorial and international waters. Sea turtles will be opportunistically captured during Project II for collection of blood samples, stomach contents, and tissue biopsy and to attach satellite tags. The SWFSC also requests the salvage and import/export of cetacean, pinniped, and sea turtle parts, specimens, and biological samples collected during these projects.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.
