

• The names and/or descriptions of persons involved or suspicious parties and license plates as appropriate.

There are approximately 3,000 pipeline companies in the United States. TSA estimates that pipeline operators will require a maximum of 15 minutes to collect, review, and submit primary/alternate security manager and security operations or control center contact information by telephone or email. Assuming voluntary submission of the requested information by all operators, the potential burden to the public is estimated to be a maximum of 750 hours. (3,000 companies × 15 minutes = 750 hours) Turnover of security personnel would necessitate changes to previously-submitted contact information on an as-occurring basis. Assuming an annual employee turnover rate of 10 percent, the potential burden to the public is estimated to be a maximum of 75 hours. (3,000 companies × 10 percent turnover = 300 updates; 300 updates × 15 minutes = 75 hours)

Reporting of pipeline security incidents will occur on an irregular basis. TSA estimates that approximately 140 incidents will be reported annually, requiring a maximum of 30 minutes to collect, review, and submit event information. The potential burden to the public is estimated to be 70 hours. (140 incidents × 30 minutes = 70 hours)

Use of Results

TSA's Pipeline Security Division will use the operator contact information to provide security-related information to company security managers and/or the security operations or control center. Additionally, TSA may use operator contact information to solicit additional information following a pipeline security incident. TSA will use the security incident information provided by operators for vulnerability identification and analysis and trend analysis. TSA may also include the information, in redacted form, in the TSA Office of Intelligence Transportation Suspicious Incident Report (TSIR), an unclassified weekly comprehensive review of suspicious incident reporting related to transportation which is provided to industry and government stakeholders. To the extent that incident information provided by pipeline operators is SSI, it will be protected in accordance with procedures meeting the transmission, handling, and storage requirements of SSI set forth in 49 CFR parts 15 and 1520.
